**... Lend Me Your Ears**

By Cory Soal  
R.H.A.D.

**YOUR CHILD'S HEARING**

Hearing is one of the basic ways we communicate. From early infancy, we being to distinguish sounds and attach meanings. We learn our first words from hearing others speak. Sometimes our hearing fails us. Hearing also can happen to anyone, regardless of age. Occasionally children are born with hearing defects. During these early years hearing loss can be mistakenly diagnosed as A.D.D. (Attention Deficit Disorder). This learning disability usually accompanies poor participation in school and often low marks. A.B.R., (Auditory Brainstem Response) is used to test infants hearing without participation from the child. It is an effective way of determining hearing loss for infants. If you suspect your child has a hearing loss, call...

**KEEPING DENTURES CLEAN**

Cleanliness is the key to comfort. Only a clean denture is a comfortable denture. Just as natural teeth must be brushed regularly, so should your denture. It takes only a few minutes. The denture brush, designed specifically for this purpose, is available at our office, free of charge.

When cleaning your denture, fill the basin with warm water to prevent breakage if the denture should slip from your hands. Hold the denture just above the water and brush it thoroughly inside, outside and between the teeth. Never use hot water or gritty powders. Rinse the denture thoroughly and replace it carefully.

If your mouth has a tendency to form tarter deposits, it is important to remove the tarter from the denture regularly. At least one a week, place your denture in a cleanser overnight. This will soften the tarter deposits so they can be removed easily with a brush. Your denture will have no odor as long as it is clean.

If you have any questions regarding your dentures, give our office a call.

You do not need a referral; simply call our office direct.
