Guide to the Outdoors
Julie Pomeroy

This fall, get out and discover Escarpment Country in Halton! Ron Brown has written a book called ONTARIO'S SECRET LANDSCAPES or 50 more visits to unusual Ontario (\$19.95). Chapter 33 is called the Strange Story of Crawford Lake. In it he describes the Conservation Area as a rare find because of Crawford Lake which geologists call "meromictic" - extremely deep resulting in many unusual lake effects. Lake Crawford is estimated to be 15,000 years old and among the layers of silt that cover the bottom, scientists have discovered evidence of pre-historic Huron habitation. Check it out! Crawford Lake is located on the Guelph Line 5 km. S. of Hwy #410. 905-854-0234, crawlake@hrca.on.ca

Tooth Chatter

by ALEX TRENTON DENTURIST

"HAD A FALLING OUT?"

If a tooth is lost it's important to replace it with an artificial one to prevent your other teeth from drifting out of line. These neighboring teeth can become more susceptible to decay and gum disease. Tooth misalignment can also cause jaw problems.

These are four main types of artificial teeth. Each is designed to solve a specific problem.

- *A removable partial denture
- *Complete or full dentures
- *Dental implants
- *A fixed partial denture or fixed bridge

Be sure to carefully consider which dental prosthesis is right for you. You do not need a referral, simply call our office direct.

Consultations are always free. If you have any questions regarding your dentures, give our office a call.
