

Make sure your car is ready to tackle the hazards of winter

Have a reputable garage do a tune-up and inspection on your car before winter starts.

Brakes-must be faultless and equalized so there is no pulling to one side which may cause skidding.

Tires-snow tires, with proper tread, increase traction in soft snow and should be installed at least on the drive wheels. All snow tires on wheels, with good treads are adequate in some regions.

Exhaust System-check muffler and tail pipe system for carbon monoxide leaks to prevent gas poisoning. Leaks are especially dangerous during cold weather driving when the windows are closed.

Windshield Wipers-should be checked for cracks and proper tension.

Battery-battery power declines in cold weather. Have your battery checked and replaced if necessary.

Heaters and Defrosters-should be checked to see they are operational.

Fuel System-keep your gas tank full. A full tank of gas minimizes condensation which may cause gas line

freezing. Add gasoline antifreeze occasionally.

Basic Equipment-the following items should be carried for winter operation: windshield scraper, snow brush, lightweight shovel, reinforced tire chains, tire wedges (to prevent rolling), a bag of sand, wire traction mat or some other suitable abrasive substance, rubber mallet, chain, large facial tissues, properly inflated tire, wheel wrench, wheel jack, first aid kit, pliers, flashlight, flares, battery jumper cables, supply of gasoline antifreeze.

a second set of keys can be easily lost in deep snow.

Clean snow off all windows. Remove loose snow from the hood and roof to prevent it from blowing up on the windshield or piling up on the back window as you drive. Don't be a peep hole driver, ensure windows are defogged before starting out. Before leaving the driveway, make sure the automatic choke is off and your headlights (low beam) are on.

KROWN RUST CONTROL

«» Non Flammable «» Non Toxic «» Environmentally Friendly «»

A Proven Method To Protect Your Automotive Investment

The Only Rust Control System Approved By The Automobile Protection Association

We Are So Confident We Encourage You To Watch Us **KROWN** Rust Control Your Car.

KROWN LUBRICATES

- Windows & Door Mechanisms
- Door Locks
- Electrical Switches
- Brake Cables
- Transmission Linkage
- Remote Mirrors
- Door Hinges
- Hood & Trunk Hinges
- Rubbing Parts
- Power Antennas
- C.V. Joints

KROWN PROTECTS

- All Body Panels
- Spot Welds
- All Chrome
- Cowl Assemblies
- Headlight pot & Adjusters
- Transmission Cases
- Oil Pans
- Sub frames & Hidden Box Sections
- Inner Framework
- Wiring Connections
- Computer Chips

WINTER DRIVE SAFE PACKAGE

Let us assess your condition.

- ✓ Replace Oil Filter
- ✓ Inspect Battery
- ✓ Inspect coolant level and freezing point
- ✓ Inspect radiator and related hoses and clamps
- ✓ Inspect all brakes
- ✓ Inspect tire wear and pressure
- ✓ Inspect oil level, power steering fluid level (if applicable), brake fluid level, clutch fluid level (if applicable)
- ✓ Inspect drive belt condition (excludes timing belt)
- ✓ Inspect distributor cap, rotor and wires
- ✓ Inspect windshield wipers, washer jets and blades
- ✓ Inspect exhaust system
- ✓ Inspect springs and shock absorbers
- ✓ Inspect all lights and bulbs
- ✓ Inspect block heater
