BRACKNELL TELECOM SERVICES

Construction Crews - Riggers

Bracknell Telecom Services (www.bracknell-telecom.com) serves the infrastructure facility needs of the rapidly evolving wireless telecom community across North America. BTS provides multi-service telecom facilities solutions including design, implementation, management services and construction. As a result of business growth our Mississauga office requires four (4) construction people who are committed to the growth of this leading edge company.

Bracknell Telecom Services requires Construction Crews - Riggers experienced in Tower foundation, steelwork antennas/lines and electrical and lightning protection systems, as well as Rooftop steelwork, antenna mounts, cable tray, antennas/lines and electrical lighting protection systems. In order to accurately build a telecommunication site, successful candidates must have the ability to read and understand drawings, identify and solve problems, and be able to converse with engineers, clients, subcontractors and property managers. BTS has immediate openings for four (4) Riggers to be based out of our Mississauga office. The ability to travel is a must.

Submit resumes in confidence to:

Bracknell Telecom Services
FAX: (905) 673-6411
E-Mail: humanresources@bracknell-telecom.com
All resumes must be received by November 17, 2000

wireless solutions

COMMUNICATIONS & POWER INDUSTRIES CANADA INC. (CPI),

formerly known as **VARIAN CANADA**, is a well-established Canadian company and the world leader in the development, manufacturing, and marketing of microwave klystrons used for satellite communications.

As part of a corporate re-alignment, we are transferring responsibility including all manufacturing and support activities for our complete line of satellite uplink amplifiers/transmitters from Silicon Valley, California to our Canadian operation in Georgetown, Ontario. As a result of this transfer and internal growth, our total sales are expected to triple.

CPI is a world leader in the development, manufacture, and marketing of amplifier subsystems for satellite uplink communications used for broadcast, telephone, data, and Internet applications. Our products cover all of the frequencies from 2 to 40 GHz and beyond with transmit powers ranging from 10 watts up to several kilowatts. These amplifiers are fully integrated high technology products that include high voltage power supplies, cooling systems, waveguide and microwave/RF components, and software and digital control systems. There are currently in excess of 15,000 of our amplifiers installed around the world.

We are looking for energetic, bright, highly motivated individuals who are interested in getting in on the ground floor of these exceptional opportunities. The following is a summary of some of our key positions; however, if you have a background which you feel could contribute to our future success in a discipline that is not listed here, please apply.

We have been providing stable high technology employment in Georgetown since 1955.

We offer the opportunity for personal growth, a salary commensurate with your challenging responsibilities, and a full range of benefits including an in-house fitness facility! We value all applicants, but only those selected for an interview will be contacted. If you are interested in this unique and exciting opportunity, please apply in writing indicating salary expectations, to:
