Tooth Chatter

by
ALEX TRENTON
DENTURIST

ADJUSTING TO NEW DENTURES FEEL

At first your new dentures might feel very large in your mouth. You may even experience a gag reaction. This is normal in the beginning. In time, with a little patience and practice, you will adjust naturally to this initial fullness and barely notice it in your mouth.

SPEECH

Many new denture wearers have difficulty at first with their speech. Words containing "S" sounds can be a problem. Practicing speech aloud with your new dentures in place will help restore your normal speaking quality. Try reading aloud from a book or magazine in front of the mirror. This will help you to get used to the new speaking position of your tongue and new denture. This will also give you more confidence. Also, before you speak, it is helpful to first bite and swallow. This will "set" the dentures in position and improve clarity.

EXCESS SALIVA

When you first receive your new dentures, you will probably notice an increase in the flow of saliva in your mouth. This is a normal response to the unfamiliar new denture. On the average, most people swallow about 600 times a day. For the first few days after receiving your new teeth, you should try to swallow more frequently. After a few days have passed, your mouth will become used to the denture, and saliva flow will return to normal.

You do not need a referral; simply call our office direct.
