

The bronze skates

The Salvation Army's Georgetown Community Church hosted a well attended craft show Saturday. Helen Russell (above) was part of the group effort that brought out many unique crafts like the bronzed hockey skates she's holding.

THE "DREADED" IMPRESSION!
 Many people are reluctant to have new dentures made because of experiences they went through when having their original set made. New technology and materials have made this procedure a "Palatable Experience".
 So now, even people with a sensitive gag reflex, that tend to gag very easily, find it much easier than they had expected. Special rubber based materials and putties are now available, thus replacing the materials known for dripping down the throat and causing that gagging feeling.
 An impression is taken of your gums. The print is then reproduced in stone, which will be an exact replica of your gums, and from this foundation your denture is made.
 So don't dread the impression! Most people report that they would have had new dentures made sooner, if they had known how much easier the impressions are today. Denture Technology is making leaps and bounds!
