THE TRANY SHOP

FIXING IT RIGHT...THE FIRST TIME

354 Guelph St., Georgetown (905) 877-7776
(in the Knolcrest Centre, near Apple Auto Glass)

The life expectancy of a vehicle transmission can be affected by many factors: poor driving habits; distance traveled each year, hauling and towing of heavy loads; as well as driving regularly in hilly terrain. One of the best ways to prolong the life of your transmission is through regular maintenance at **The Trany Shop**. Have the automatic transmission fluid and filter changed every 40-60,000 kilometres or as the owner's manual suggests. It's fast, inexpensive and can save you money and give peace of mind.

Since 1988, the primary service at **The Trany Shop** has been the maintenance and repair of automatic and standard transmissions along with clutch, drive line and drive axle repair including CV boot replacement in most cars, trucks, 4x4's, and motor homes. Owner **Dave Tucker** and the qualified technicians on staff update their training regularly to remain current with evolving technology. They are equipped with the latest equipment and reference materials needed to help determine the condition of today's complicated computer-controlled transmissions.

To help prevent viscosity breakdown of the transmission fluid, those hauling trailers and heavy loads should consider a transmission cooler from **The Trany Shop**, or perhaps a performance shift kit.

Each transmission problem is unique and has to be addressed on an individual basis. With that in mind, we suggest that you arrange to have your vehicle dropped off at **The Trany Shop** to properly evaluate any transmission concern. They offer a free road test and evaluation, at no obligation. Towing is available.
