Fire prevention

Ten facts about smoke alarms

1. Protect yourself and your family
 Most fire deaths occur in homes where there are no working smoke alarms. Remember, only a working smoke alarm can save your life.

2. Smoke alarms save lives
 Most fatal fires occur at night when people are asleep. Often, victims never wake up. A working smoke alarm will detect smoke and sound an alarm to alert you, giving you precious time to escape.

3. Buying the best alarm
 There are many types of smoke alarms, each with different features. Alarms can be electrically connected, battery powered or a combination of both. The pause feature to reduce nuisance alarms is highly recommended.

4. One smoke alarm is not enough
 Install smoke alarms on every level of your home and near sleeping areas. If you or your loved ones sleep with bedroom doors closed, install an alarm inside each bedroom.

5. Where to install smoke alarms
 Because smoke rises, you should place alarms on the ceiling. If you cannot do this, place them high up on a wall, according to manufacturer's instructions. There are certain locations to avoid such as near bathrooms, heating appliances, windows, or close to ceiling fans.

6. Test your smoke alarm regularly

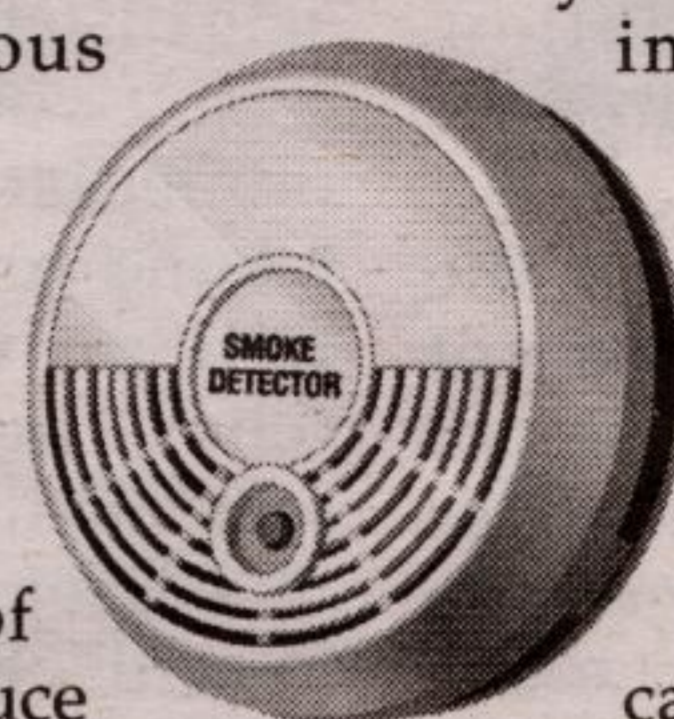

Every month, test your smoke alarms, using the alarm test button. Once a month test your alarms using smoke from a smouldering cotton string. Follow your owner's manual.

7. Change your clock, change your battery
 Install a new battery of the proper type at least once a year. If the low battery warning beeps, replace the battery immediately. We change our clocks each spring and fall so this a good time to change your smoke alarm batteries too.

8. Gently vacuum alarm every six months
 Dust can clog a smoke alarm, so carefully vacuum the inside of a battery powered unit using the soft bristle brush. If electrically connected, shut off the power and vacuum the outside vents only. Restore power and test unit when finished.

9. Smoke alarms don't last forever
 Smoke alarms do wear out, so if you think your alarms are more than 10 years old, replace them with new ones.

10. Plan your escape
 Make sure that everyone knows the sound of the smoke alarm and what to do if a fire occurs. Regularly practice your home fire escape plan. Know two ways out of every room and have a pre-arranged meeting place outside. Once out, stay out and call the fire department from a neighbour's home.
