Kinsmen & Kinette Clubs of Canada and the Canadian Cystic Fibrosis Foundation.

The Kinsmen Club of Georgetown contributes to many services and groups in the Georgetown area. As well, we contribute to the Kinsmen and Kinette National Service Project, Cystic Fibrosis. The article below is from The Canadian Cystic Fibrosis Foundation website www.ccff.ca

2003 marks the 39th Anniversary of the Kin-CF partnership. This wonderful partnership dates back to a chance meeting between Dr. Douglas Crozier, then the Cystic Fibrosis Clinic Director at the Hospital for Sick Children in Toronto, and Kinsmen Bill Skelly. Bill invited Dr. Crozier to speak to the North York Kinsmen about CF, and the club generously began raising funds to support the fight against cystic fibrosis. In 1964, District 8 of our association adopted CF as their District project. From there the message spread across Canada, and in 1987 the Kinsmen & Kinette Clubs of Canada adopted CF as their National Service Project.

Kinsmen and Kinettes across Canada have raised almost \$28 million for CF research and treatment through a variety of unique events, including loonie drives, pub putts, barbeques and auctions, to name a few.

Kinsmen and Kinettes have played a very important role in the success of the Canadian Cystic Fibrosis Foundation and it's quest to find a cure for cystic fibrosis. Because of Kin's support, incredible research advances have been achieved and young Canadians with cystic fibrosis are living longer and healthier lives, and now have great hope that a cure for this terrible disease will soon be found.

Cystic Fibrosis, which attacks the lungs and digestive system, is one of the most deadly inherited diseases affecting Canadian children and young adults. One in every 25 Canadians carries the defective gene for cystic fibrosis.

The Canadian Cystic Fibrosis Foundation is a world leader in the fight against CF. Canadians discovered the gene responsible for cystic fibrosis in 1989, and continue to play a leading role in the world wide race to develop new treatments for the disease.
