Despite repeated requests, results from the other divisions were not provided.

Football squad in need of players

"HAD A FALLING OUT?"

If a tooth is lost it's important to replace it with an artificial one to prevent your other teeth from drifting out of line. These neighboring teeth can become more susceptible to decay and gum disease. Tooth misalignment can also cause jaw problems.

These are four main types of artificial teeth. Each is designed to solve a specific problem.

*A removable partial denture

*Complete or full dentures

*Dental implants

*A fixed partial denture or fixed bridge

Be sure to carefully consider which dental prosthesis is right for you. You do not need a referral; simply call our office direct.

Consultations are always free. If you have any questions regarding your dentures, give our office a call.
