... Lend Me Your Ears

LOSS OF HEARING DUE TO NON-AGING FACTORS

Hearing loss due to aging can be compounded by other things. A few of these include noise exposure, disease, and ear infections.

Hearing loss due to age and noise are cumulative. That is, hearing loss from noise exposure will be added on to hearing loss due to aging. Neither are not medically correctable. There is something to be said for protecting the hearing that we have left by wearing hearing protectors when exposed to noisy environments.

Each of us reacts differently to hearing loss. We may totally or partially deny that a problem exists. Typical "denial" statements are "you're mumbling again", or "I was not paying attention", and can be a way of concealing hearing difficulties.
