

**Never
Re-roof again.**

**WANTED!
9 HOMES THAT
NEED ROOFING**

Check newly renovated roofs at Delrex and Mountainview

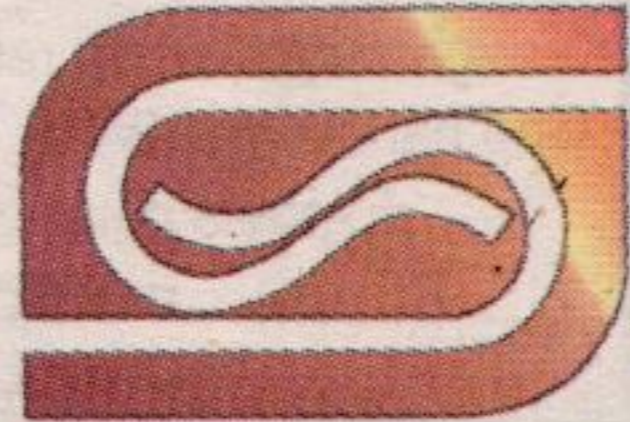

9 Homes in your area will be given the opportunity of having an INTERLOCK metal roofing system installed on their home year-round, at a reasonable cost.

This lifetime product is capturing the interest of homeowners across the country, who want to know this will be the last time they will have to re-roof their home. Our product is environmentally friendly and comes with a lifetime, transferable warranty with an excellent choice of colours to compliment your home and is being introduced to your local market. Your home can be a show place in your neighbourhood and we will make it worth your while, if we can use your home.

Spring cleaning can be fun

For most people, there is nothing about spring-cleaning that sounds like fun— unless the chores allow for personal creativity.

How about making the house clean and healthy for example, by creating tried-and-true concoctions out of kitchen staples? Before adding yet another costly solvent, spray or detergent to the line-up, take a look at these bio-friendly tips from Edgetech, an industry leader in the development of 'health smart' windows:

Kitchen & Bath Counters: Combine 1/2 cup white vinegar, 1/4 cup baking soda, 1-cup ammonia with 4.5 litres of warm water. Caution: Do not add bleach to this mix.

Windows: In a spray bottle, combine 1 cup white vinegar with 4 cups warm water. It can also be used on window frames, sills and on indoor blinds.

Hardwood Floors: Combine 1/2 cup of apple cider vinegar with 4 litres of warm water. Don't allow hardwood to get too wet. Clean small areas with a moist cloth and dry as you go.

Carpets: Use baking soda. Sprinkle thoroughly over a dry carpet, leave for 30 minutes, then vacuum. Steam clean if carpets are very stained or soiled.

Vinyl Floors: Combine a small amount of dishwashing detergent – about 1 tsp or the size of a quarter – with 4 litres warm water.

Mould and mildew: Combine 1/4 cup bleach with 5 cups warm water; use gloves to clean. Window mould is usually a sign of too much condensation on windows during winter – and this may be due to a poor window

materials. When upgrading, look for windows that display the international Energy Star seal, a rigorous standard for energy efficiency. The best windows are able to maintain a constant thermal balance between the temperatures indoors and out. This is done by the elimination of highly conductive metal materials. Before making a purchasing decision, be sure to examine the spacer edging between the glass panes and at the perimeter edge. Edgetech developed the foam Super Spacer for this reason. It contains the superior insulation properties of thermo-set rubber made from polymer structural foam. The Super Spacer scored highest in "edge-of-glass temperature trials", delivering the best resistance to condensation. More information is available online at www.healthsmartwindows.com.

Did you know?

Consumers apply less than one per cent of the active chemical ingredients used in Canada for pest control.

Ninety six per cent of pest control products are used in agricultural applications, ensuring an abundant supply of fresh fruits and vegetables; 3.2% are applied in urban areas on golf courses, in and around dwellings, power lines and rights of way, and by professional lawn care applicators. Less than 1% of pest control applications, by weight of active ingredient, are done by homeowners.
