## Tooth Chatter

by **ALEX TRENTON DENTURIST**

**CAUTION - DENTURES OVER 5 YEARS OLD?**

Removable dentures are made of hard, rigid material, unlike your face, mouth and jaw that are constantly changing over the years. Dentures cannot adapt to these changes, and teeth wear down and become dull with time - your denture might still be in good physical condition, but it's fit changes slowly over time, and most people adapt to the changes even though they are illfitting. Your dentures should be checked annually, and replaced every 5 to 10 years. If dentures are not updated, you may suffer adverse health problems, such as painful, irritated gums, softening of the gum, headaches, ear aches, neck pain, more labourous chewing that causes poor digestion. Not to mention sagging mouth that can make you look older. Don't take chances with your health. Give us a call for a check up today!

You do not need a referral - simply call our office direct.
