

I would like to take this opportunity to thank everyone who brought in a new hat or cap for our KAPS 4 KIDS program. We couldn't believe the response we received as we took in over 1000 caps. It feels great to live in a town where everyone will pull together for a great cause.

I would also like to thank my entire TURNER team for all their hard work and long hours on our recent SEMA show project truck. The truck was a big hit at the SEMA show, and gave our small company, and great town, worldwide attention for a job well done.

I truly believe we have one of the best team's in the business. They along with some of the greatest customers you could ever ask for, make Turner Automotive what it is today. We will continue to do our best to bring value to your automotive needs and support our community whenever we can.

WHY FLUSH WHEN YOU CAN EXCHANGE

Turner Automotive is proud to offer the **MOTORVAC COOLANT CLEAN** system. This not only chemically cleans your entire Heating and Cooling system, but it completely exchanges your old coolant with new. Then it treats your system with a specially formulated lubricant which provides future rust and corrosion protection. Don't be fooled by other coolant flushes that only partially service your cooling system. Remember our flush completely exchanges all of your old coolant, while chemically treating your system at the same time.

Service includes up to 12L of coolant, all chemicals and labor.

\$109⁹⁹ + tax **\$129⁹⁹ + tax**
for long life coolant
