**... Lend Me Your Ears**

By Cory Soal R.H.A.D.

**TINNITUS**

Or ringing in the ears, does not cause hearing disorders, it may accompany decreased hearing and other ear symptoms such as pressure, unsteadiness or dizziness. Often, it occurs alone.

Tinnitus arising from the inner ear frequently indicates more permanent and serious disease. Exposure to a sudden loud noise - a gunshot or explosion, for example results in tinnitus that subsides to a low level of ringing for an extended period of time. Disorders affecting the cochlea (hearing center) of the inner ear can cause tinnitus.

**Where Child Abuse Hurts Most**

Sometimes the worst scars of child abuse can't be seen. Whether physical or emotional, abuse attacks a child's self-esteem and emotional development; leaving long-term emotional trauma and pain. You can help prevent child abuse by being a nurturing parent or caregiver. By letting children know they are special, competent and loved, you can help them develop positive self-images and happier futures. If you feel overwhelmed, angry or frustrated as a parent, help is out there for you. Look in your area for support groups and services, or talk to a trusted friend, family member, pastor or doctor about what you can do to protect and support your child. If we all do our part to prevent child abuse, we'll get to the heart of the matter.
