The Regional Municipality of Halton
A Partnership That Works!

NOTICE OF COMMENCEMENT

**Class Environmental Assessment
Retirement of Tenth Line Well Facility
Georgetown Water Supply System
Town of Halton Hills, Region of Halton**

The Regional Municipality of Halton has initiated a Class Environmental Assessment (EA) to retire the Tenth Line municipal water supply well facility. The Tenth Line well was taken out of service in May 1999, as it does not have sufficient capacity to operate as a municipal supply well. Halton Region intends to retire the process equipment and unused pumping station building. Halton Region will abandon the Tenth Line Well as required by the Ontario Ministry of the Environment (MOE) under Regulation 903 of the Ontario Water Resources Act.

A water facility that was subject to the Class EA process for its establishment is also subject to Class EA requirements for its retirement as described in the document entitled Municipal Class Environmental Assessment (Municipal Engineers Association, June 2000). The Class EA for the Tenth Line Well Facility Decommissioning will be conducted in accordance with Schedule B of the Municipal Class EA process.

Input from interested stakeholders is a key component of this project. Halton Region is interested in any comments that you may have concerning this project and will receive comments in writing until December 3, 2004. Subject to comments received from review agencies and the public, the decommissioning activities associated with the retirement of the Tenth Line well facility are anticipated to commence in the spring of 2005.

For additional information about the project, to provide comments or to be added to the project mailing list please contact:
