## Never touch a discarded syringe

I was speaking to a paramedic the other day, and she alerted me to the fact that there has been an increase in the number of needles that have been reported found in the community.

What should you do if you, or your child, come across a used syringe?

Rule #1: Don't touch! There are a couple of numbers that you can phone. You can call the Region of Halton at 905-702-4200 and someone will come up to collect and dispose of the needle. You can also call the Halton Regional Police Service at 905-878-5511. An officer will attend, collect and dispose of it. All of the cruisers have biohazard kits in the trunk with a needle disposal container.

Don't pick up syringes yourself. They should never be disposed of in general garbage.

Many of these items are showing up at this time of year, along with other garbage, because they have spent the winter in the park, or other areas. You should never allow children to be barefoot in parks or schoolyards. All kinds of diseases can live on the end of those syringes.

If you would like more information about this or other police matters, contact me at 905-878-5511 ext 2120 or laurel.barnett@hrps.on.ca
