DENTURIST

#### "HAD A FALLING OUT?"

If a tooth is lost it's important to replace it with an artificial one to prevent your other teeth from drifting out of line. These neighboring teeth can become more susceptible to decay and gum disease. Tooth misalignment can also cause jaw problems.

These are four main types of artificial teeth. Each is designed to solve a specific problem.

- \*A removable partial denture
- \*Complete or full dentures
- \*Dental implants
- \*A fixed partial denture or fixed bridge

Be sure to carefully consider which dental prosthesis is right for you. You do not need a referral; simply call our office direct.

Consultations are always free. If you have any questions regarding your dentures, give our office a call.

You do not need a referral - simply call our office direct.

Creating confident smiles since 1982.

### ... Lend Me Your Ears

#### LOSS OF HEARING DUE TO NON-AGING FACTORS

Hearing loss due to aging can be compounded by other things. A few of these include noise exposure, disease, and ear infections.

Hearing loss due to age and noise are cumulative. That is, hearing loss from noise exposure will be added on to hearing loss due to aging. Neither are not medically correctable. There is something to be said for protecting the hearing that we have left by wearing hearing protectors when exposed to noisy environments.

Each of us reacts differently to hearing loss. We may totally or partially deny that a problem exists. Typical "denial" statements are "you're mumbling again", or "I was not paying attention", and can be a way of concealing hearing difficulties.

### Cycling for Community Living

Participants in the annual Community Living North Halton Bike-a-thon circle the Georgetown Fairgrounds track including two youngsters who didn't have to pedal. Janelle Blackbird, 5, with seven-month-old Nahawnee Blackbird, travelled in the back of a bike trailer.
