

Today is Elder Abuse Awareness Day

Area residents are encouraged to drop by Georgetown Marketplace today (Wednesday) during Elder Abuse Awareness Day to learn more about the serious and growing problem in society.

Halton Regional Police Const. Laurel Barnett, along with a Halton Hills Community Support and Information official, will be at the Halton Hills Fire Protection and Prevention Services booth,

located near Loblaws, from 1 p.m. to 4 p.m. handing out literature and answering questions about elder abuse

Elder abuse is any action, or lack of action, that causes harm to an older adult.

According to statistics approximately 5 to 12 per cent of Halton's senior population has experienced elder abuse, which can be in the form of physical, psychological, financial and neglect by caregivers.

Region celebrating Week of the Child this week

Halton Region is celebrating the Week of the Child this week.

The designation, established by the Association of Early Childhood Educators Ontario (AECEO), is designed to focus on the needs, rights and interests of children, and to heighten awareness about the value of quality early childhood education.

Regional employees will celebrate all this week until Friday with a series of internal activities focusing on children. Events are also being planned for children and their families throughout Halton.

The Region is asking residents to check local listings for activities in their communities.

ACTON

Sobeys

would like to welcome
MARK LATIMER

as their new **Store Manager**

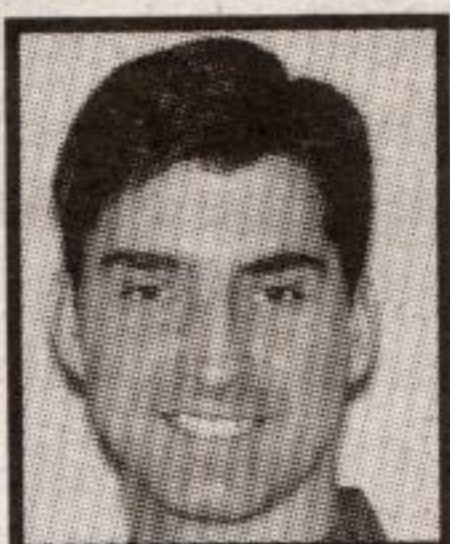

Mark, who resides in Georgetown, has come to us from North Park Sobeys in Brampton. Mark is very excited to be in Acton and looking forward to continuing to provide excellent service and community based involvement for years to come.

As always, Acton Sobeys is "Ready To Serve."

DIGITAL AUDIO PROCESSING

Digital technology is used everywhere. It enables communication satellites to link people and computer systems all over the world in products such as telephones, compact disc players and personal computers. Digital technology has become part of our daily lives. Now, digital technology transforms the way we communicate on a more personal level.

Researchers have spent years looking for a way to put the superior acoustic quality of digital sound processing into something as small as a hearing instrument. Finally the breakthrough, digital audio processing designed to fit into a small, comfortable and attractive hearing instrument. Using the same digital technology that brought superior sound quality to CD players, sound reproduction is clear, distinct and provides a rich and full sound picture. Soft sounds are amplified so they become audible, and loud sounds are kept from becoming uncomfortably loud.

Communication forms, maintains and enhances relationships between people. Good communication is a vital ingredient to an enriched life. Now digital technology offers a whole new range of possibilities for people with a hearing difficulty.
