## Tooth Chatter

by  
**ALEX**  
TRENTON  
DENTURIST

### "HAD A FALLING OUT?"

If a tooth is lost it's important to replace it with an artificial one to prevent your other teeth from drifting out of line. These neighboring teeth can become more susceptible to decay and gum disease. Tooth misalignment can also cause jaw problems.

These are four main types of artificial teeth. Each is designed to solve a specific problem.

\*A removable partial denture

\*Complete or full dentures

\*Dental implants

\*A fixed partial denture or fixed bridge

Be sure to carefully consider which dental prosthesis is right for you. You do not need a referral; simply call our office direct.

Consultations are always free. If you have any questions regarding your dentures, give our office a call.

You do not need a referral - simply call our office direct.

### ... Lend Me Your Ears

#### LOSS OF HEARING DUE TO NON-AGING FACTORS

Hearing loss due to aging can be compounded by other things. A few of these include noise exposure, disease, and ear infections.

Hearing loss due to age and noise are cumulative. That is, hearing loss from noise exposure will be added on to hearing loss due to aging. Neither are not medically correctable. There is something to be said for protecting the hearing that we have left by wearing hearing protectors when exposed to noisy environments.

Each of us reacts differently to hearing loss. We may totally or partially deny that a problem exists. Typical "denial" statements are "you're mumbling again", or "I was not paying attention", and can be a way of concealing hearing difficulties.

#### 2006 BUDGET MEETING

Budget Committee will be commencing Budget deliberations on **Monday, January 16, 2006**, at 6:00 p.m.

Please note all delegations will be heard on Monday, January 16, 2006. Accordingly, if you wish to address Budget Committee, please register by **Wednesday, January 11, 2006**, to Leesa Emmerson at 905-873-2601, ext. 2333. 197

#### EMPLOYMENT OPPORTUNITY

Part-Time ECE Instructor  
- Recreation and Parks  
Posting No. 200601

The Recreation and Parks Department requires a part-time ECE Instructor for its Preschool programs in Georgetown.

#### RESPONSIBILITIES

- Successful candidate will provide a variety of preschool activities for children ages 2-1/2 to 5 years of age.
- Responsible for provision of craft, game, song, learning and special event type activities.
- Responsible for offering a structured program that will help prepare participants for entry into elementary school.

#### QUALIFICATIONS

- The successful candidate must be creative, caring and have experience working with children in a preschool/nursery setting.
- Preference will be given to those with current ECE qualifications (or equivalent) and first aid training.
- Candidates must be willing to obtain a criminal reference check prior to commencing employment.

#### SALARY RANGE

The salary range for this part-time position will be \$17.06 to \$20.30 per hour (January 1, 2006 rates), commensurate with qualifications and experience. The successful candidate MUST be able to work Monday, Wednesday and Thursday mornings (6-10 hours/week).

Qualified candidates may submit a detailed resume in confidence by 4:30 p.m., Friday, January 13, quoting Posting No. 200601 to:

**Q:** What is Low Level Laser Therapy? How does LLT work? Which conditions are treated using LLT?

**A:** LLT, or Low Level Laser Therapy is a non-invasive, safe and painless tool in managing the pain of musculoskeletal disorders. It has been successfully used around the world for over 30 years, with no reported long-term side effects. LLT is the application of red and near infra-red light over injuries or lesions to improve soft tissue healing and give relief for pain. LLT, also called Cold Laser, is different from hot lasers, commonly used in surgery. The effects of LLT are biochemical and not thermal; it cannot cause heating and thereby damage to living tissue. When the laser contacts the skin, the patient experiences no warmth or burning sensation as a result of the laser. Most people feel nothing at all while a few may feel a slight tingling during the treatment. LLT is used to increase the speed and quality of tissue repair, improve function of damaged tissue, relieve the pain and resolve inflammation. In other words, it stimulates and energizes the cells. It is an excellent alternative to needles for acupuncture.

The LLT produces a beam of light with a specific wavelength and frequency, which applied over the injured area to stimulate healing. When the light penetrates the injured tissue, the electromagnetic energy of the light is converted to chemical energy within each cell; it leads to chemical reaction in the cell, which results in acute and chronic pain relief, reduction of swelling and inflammation, stimulation of nerve function, increase of tissue strength, stimulation of tissue healing, increased mobility or range of motion.

LLT is used for soft tissue injuries, joint conditions, most myofascial related chronic and acute pain. The following are conditions successfully treated with Low Level Laser: Whiplash Injuries, Headaches, Fibromyalgia, Carpal Tunnel Syndrome, Chronic neck, back, and shoulder pain, Knee Pain, Joint Pain in knees, hands, ankles, and hips, Arthritis, Osteoarthritis, Rheumatoid Arthritis, Rotator Cuff Injury, Bursitis, Tennis Elbow and Golfer's elbow, Plantar Fasciitis, Tendonitis, TMJ, Neuropathic Pain, Facet Syndrome, Ankylosing Spondylitis, Muscle Sprain/Strain, Myofascial Pain Syndromes, and other Musculoskeletal Injuries.

**Q:** How do I get rid of bad breath?

**A:** That depends on what is causing it. Often, bad breath results from less-than-optimal oral health and sometimes people are not aware that they are not performing oral hygiene as effectively as they could be. A dental hygienist or dentist will be able to evaluate your oral health procedures and make recommendations for improvement, also these professionals will be able to recognize any associated problems that might be contributing to an unpleasant mouth odour. In addition to evaluating and suggesting alterations to your brushing, flossing, and tongue deplaque regimen, your dental hygienist may recommend products such as a mouth rinse that contains zinc. If it turns out that the problem isn't in the mouth, a physician appointment is advisable. Sinus problems, stomach problems and certain foods and medications, and other factors can contribute to bad breath.

## Halton Hills Speech Centre

Division of M. Karen MacKenzie-Stepner Speech-Language Pathology Professional Corporation

**Georgetown L7G 5B5**

**905-873-8400** [www.haltonspeech.com](http://www.haltonspeech.com)  
**Q:** My husband suffered a stroke recently and now has aphasia. What can I do to help?

**A:** Following a stroke some people have difficulty understanding what others are saying or have difficulty speaking. This is called Aphasia (AA-FAY-ZIA). There are many things that you can do to assist your husband to communicate to the best of his ability. Depending upon his specific difficulties a Speech-Language Pathologist can help you develop a personalized program that will help both of you.

The following is another option that is available to you. The Halton Aphasia Centre has two programs operating. On Mondays the group meets at the Glen Williams Town Hall and Tuesday a Burlington group meet at The Wellness House in Burlington. People with aphasia, due to stroke or head injury, have limited means of communication and this program provides supportive opportunities for the exchange of information, opinions and feelings. It is offered once per week at the above mentioned locations from 9:30 a.m. to 1:30 p.m. and is open to anyone, subject to assessment. This program's goal, under the supervision of a Speech-Language Pathologist, is to help aphasic adults recover to some degree their former communication skills, thus reducing their social isolation and improving their quality of life. For more information contact the Halton Aphasia Centre at 905-702-5312 or toll free 1-866-204-4044. Are you interested in becoming a volunteer communication facilitator? Please call for more information.
