**DENTURIST**

**CLEANING YOUR DENTURES**

Keeping your dentures clean is the most important patient responsibility in good oral health. Dentures, like natural teeth, attract plaque, become stained and collect food particles that can cause bad breath. The two best methods of cleaning dentures are brushing and soaking.

**SOAKING**

Soaking your dentures every night with an effervescent tablet will effectively cleanse away food particles from crevices and spaces between the teeth. It will remove plaque and odour-causing film, and eliminate virtually all micro-organisms.

**BRUSHING**

The most effective cleansing method is brushing with a special denture brush and paste. Use a special denture paste, as regular toothpaste may be too abrasive, and can damage the acrylic surface of your dentures. Brushing daily will maintain the bright natural appearance, as well as leaving your mouth feeling fresh. Brushing is recommended for removal of plaque. The best cleaning method is to combine both brushing and soaking.

We can clean your dentures professionally for stubborn stains and build up. Also, "Lavdent denture Cleanser" is available through our office, and is the next best thing to Professional denture cleaning.

You do not need a referral; simply call our office direct.
