Andrews named Business of the Month

Andrews Scenic Acres was chosen as Halton Hills Chamber of Commerce for the month of March, and Chamber president Wendy Hue and Membership Chair Helen MacCormack dropped by the farm's 10 Sideroad location to present owner Bert Andrews with the sign to hang in the store for the month.

It's about time!!

By Mike Harris

As warmer weather approaches, and the urge to get on the golf course increases, it is important to address your equipment requirements for the upcoming season.

Simple maintenance is very important to ensure you have the best chance of playing your best this season.

The first thing to check is the condition of your grips. An indication that you may need your clubs regripped is if the rubber has hardened to a point where you cannot easily mark the surface with a fingernail. (More obvious indications are wear marks and cracks near the end of the grip towards the shaft of the club.)

Grips traditionally lose their flexibility and softness after 2 seasons, and more quickly if you play more than twice a week on average. Things such as perspiration, sun damage, and rain accelerate the wear on grips.

Apart from having your clubs regripped, you can also clean them with a mild soapy solution. Simply scrub the grips with a firm brush, and then scrub dry with an old rag, or towel. You will be shocked by the amount of dirt removed from the grip.

The golf grip is your only contact with the club, so make sure you take care of them!!

Golf Thought of the Week: There are two things you can learn by stopping your backswing at the top and checking the position of your hands... How many hands you have, and which one is wearing a glove!
