# Youth-a-PALOOZA! set for Saturday

I would like to take a break from my Driving 101 series for a few special events that are coming up.

What are you doing tomorrow (Saturday)? Nothing? Good. Tomorrow, April 29, from 11 a.m. to 6 p.m. is the first annual Milton Youth-a-PALOOZA! ...in Milton.

Youth-a-PALOOZA is a youth-oriented event organized by the youth of the Milton Mayor's Youth Advisory Council. The event offers a barbecue, air bounce amusements, rock climbing, air brush and henna tattoos, a youth art showcase, youth vs. emergency services floor hockey, softball and more. Wristbands are available for those who want to do it all and save money. Also, 7 p.m. to 11 p.m.

**Const. Chris Borak**

there is a live band show, with limited space. The event is located at the Lions Sports Park, 77 Thompson Road, South of Main Street East, Milton.

I know you're thinking: "But it's in Milton." It really isn't that far away, and a lot of youth thought and youth

effort went into the event in the hopes that it would give the youth in the area a day for them to celebrate international youth week and for those who are looking for something to do. If you still are thinking it is too far out of our town, I will be there giving out autographs with other real life police officers... will I see you there?

Contact me personally for crime prevention tips, or for police information regarding community concerns through 905-878-5511 extension 2470, or by e-mailing [chris.borak@hrps.on.ca](mailto:chris.borak@hrps.on.ca). Please reserve the 911 system for emergency calls only.

## More Pond Myths Debunked

Water in the landscape is a lifestyle more and more people are choosing every day. Check back each week as we dispel some of the common myths surrounding this latest trend in gardening.

**Myth 4: Ponds need daily water testing and corrective treatment.**

**Fact: If the pond is not chemically-dependent, there's nothing to test for. Mother Nature never tests her water. She doesn't use any store bought chemicals or pharmaceuticals. Neither should you for the most part. Stick to the program of ecosystem water gardening and let your pond grow healthy on its own. There is a difference between a chemically dependent pond and one that uses chemicals wisely.**
