 please contact Bonnie Shulman at
 bonnie.shulman@hrps.on.ca
 (905) 825-4777 Ext. 5085

Drop in and wish Chief Algar all the best on his 38 years of dedicated service.

Clear the way for emergency vehicles

Driving 101 part six, emergency vehicles, my favourite.

Flashing red lights in your rear-view mirror mean you must slow down, move to your right and stop near the curb or right edge of the roadway. The Ontario Highway Traffic act actually states that you must immediately bring your vehicle to a standstill, but I prefer you come to a safe stop... to your right... so we can pass you on your left.

If you slow down but stay in the left lane, and wait for an emergency vehicle to pass you on your right you are putting the emergency responders in danger, and you are wasting the crucial response time that someone is counting on.

If you are driving and you see flashing red lights stopped ahead in

Const. Chris Borak

the distance, please slow down and move into a lane that is further away from the lights if possible. As you drive by the lights, do so with extreme caution, look for a police officer directing traffic, or emergency workers on the roadway.

Resist the temptation to watch us in action; it only puts people in danger as the average person typi-

cally drives towards where they are looking.

If there are flashing red lights and an odd siren sound coming towards you please slow down and move to the right of your roadway and stop, wait for the emergency vehicle to pass you before you continue, but take a moment to see if there are any other emergency vehicle coming before you do so.

Contact me personally for crime prevention tips, or for police information regarding community concerns through 905-878-5511 extension 2470, or by e-mailing chris.borak@hrps.on.ca. Please reserve the 911 system for emergency calls only.

—Const. Chris Borak is the community support officer for District 1

Notice of Commencement.

HALTON HILLS GENERATING STATION

TransCanada Energy Ltd., a wholly owned subsidiary of TransCanada Corporation has commenced planning for a new energy generation facility - the Halton Hills Generating Station - in the 401 industrial corridor in the Town of Halton Hills on a site located between Highway 401 and Steeles Avenue west of 6th Line on undeveloped, industrial lands in the Town of Halton Hills.

This project is being developed in response to the Ontario Power Authority's planned procurement for new generation in the Greater Toronto Area West of Toronto - Request for Proposals No.: GTA-Trafalgar-RFP-2006 Issued: April 28, 2006.

TransCanada will be submitting a proposal to develop a 680 mega-watt natural gas fuelled, combined cycle power plant. If the Ontario Power Authority selects this proposal, and the project achieves all approvals the project will be constructed.

The proposed project will use state-of-the-art low emission, high efficiency technology.

The Halton Hills Generating Station is subject to the Environmental Screening Process for electricity projects as outlined in the Ontario Ministry of the Environment's "Guide to Environmental Assessment Requirements for Electricity Projects." (March 2001)

This notice has been issued to advise the public, other stakeholders and government agencies of TransCanada's proposal and the commencement of the Environmental Screening Process.

TransCanada is committed to engaging and consulting with the public and other stakeholder groups throughout the development of the project. The consultation and engagement process will seek community input regarding local environmental and socio-economic conditions, facility design plans, anticipated project benefits and impacts and impact management plans.

Project Open House

We invite you to attend the first proposed Halton Hills Generating Station project open house to be held: **WEDNESDAY, JUNE 7, 2006, 4:30pm - 8:30pm**, with a small presentation at 6:45pm, at the Pineview Public School on 13074 Fifth Side Road.

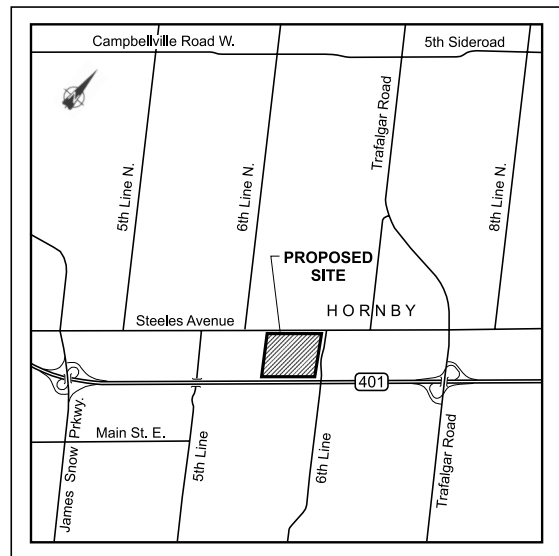

Should you not be able to attend the Open House or would like further information, please direct your inquiries, comments or requests for further information regarding the project to:
