

**NOTICE OF TENDER****CONTRACT P-2006-C-02**

Sealed tenders, clearly marked as to the contents, will be received by the Finance Department at the Civic Centre, 1 Halton Hills Drive, Halton Hills (Georgetown), until 2:00 p.m., local time,

Tuesday, June 13, 2006

for the Town's 2006 Pavement Management Program (Acton).

The major items of construction are:

- Grind asphalt 20,000 m²
- Earth excavation 1,000 m³
- 150 mm subdrains 3,100 m
- Granular A 1,650 t
- Concrete curb & gutter 1,120 m
- Hot mix asphalt 4,680 t

Plans, specifications and Form of Tender may be obtained from the office of the Town's Finance Department upon payment of \$80.00 (GST included), non-refundable deposit.

A certified cheque or bid bond in the amount specified in the tender documents must accompany each tender.

Inquiries relating to the project should be directed to Mr. Ron Goddard, C.E.T., Manager of Engineering Design & Capital Works at 905-873-2601 extension 2310. Tenders will be opened at 2:00 p.m., Tuesday, June 13, 2006 at the Civic Centre. Those submitting tenders are invited to attend.

Lowest of any tender not necessarily accepted. 79

**THE CONSERVATION ZONE
LIGHTS! LUMENS!
ACTION!**
Peter Love
Chief Energy Conservation Officer of Ontario

My role as Chief Energy Conservation Officer is to ensure conservation and energy efficiency play a vital role in Ontario's ongoing energy strategy.

Since it's cheaper to save energy than to make it, a big part of today's conservation culture involves finding ways to conserve. Replacing incandescent bulbs with energy efficient or "smart" lighting is a bright idea.

Did you know that energy efficient lighting...

- saves you money on your energy bill?
- produces just as much light?
- lasts longer than standard bulbs?
- uses less energy?

In the past decade, the selection of energy efficient lighting products has significantly improved. This translates into more products that can replace virtually every type of lighting in your home or business. Next time you're shopping for replacement bulbs, or installing a new fixture, take a few moments to find the most energy efficient choice available.

Though energy efficient lighting costs slightly more than traditional light bulbs to buy, they are generally much longer-lasting and use much less energy, making them less expensive in the long run.

Check labels when you shop for lighting. You want to find bulbs with the desired light output (lumens) with the lowest wattage (amount of electricity used to produce light).

The Conservation Bureau's *Every Kilowatt Counts* campaign is currently in stores. Look for discount coupons on compact fluorescent light bulbs, timers, ceiling fans, and programmable thermostats.

And don't forget – the simplest way to save lighting energy is to turn lights off when you're not using them!

As Chief Energy Conservation Officer, I issue a friendly challenge to all Ontarians to think about how you use energy every day and find new ways to conserve it. Imagine the effect if all 12.5 million Ontarians put their minds to saving energy daily.

I believe it can happen - one light bulb at a time. Together, let's do it!

The Conservation Bureau develops and delivers programs to help Ontario residents conserve energy and save money. For more information, please visit www.conservationsbureau.on.ca.

If you think
baby boomers have
too much, you're right.
In the next decade **1 in 4**
will have **diabetes**.

The finishing touch

Andrew Upton, 8, decorates a wooden "paddler" at the Paddle-to-the-Sea workshop held in the Georgetown Market Place recently. Children were allowed to decorate a "paddler", for a toonie, for their entry into the June 4 Riverfest-Norval race.

Local Wal-Mart associate to attend shareholders' meeting in Arkansas

Wendy McBurney, a Georgetown Wal-Mart associate, is packing her bags and heading to Arkansas.

The invoicing associate at the local store was recently chosen to represent the associates in the Georgetown store at the 2005 Wal-Mart shareholders meeting to be held June 2 in Fayetteville, Arkansas.

The company-funded trip will include a tour of the Wal-Mart head office in Bentonville, Arkansas, free concerts by top performers, a visit to the Wal-Mart Museum and a supplier product fair.

McBurney will also have the chance to share ideas with top executives of the company including Wal-Mart Canada president and CEO Mario Pilozzi.

"I am really excited about the opportunity to travel to join my fellow global associates

and to represent our Georgetown Wal-Mart," said McBurney, a Wal-Mart employee for two years. "The associates and managers in my store have challenged me to share some of our best ideas, but I also plan to bring ideas home and to share the experience with the whole store when I return."

No opposition to office building

No one attended a recent Town of Halton Hills public meeting on a proposed professional office building at 90 Guelph St.

The building will include the offices of the applicant, dentist Dr. Michael Beier. The residential home to be converted is located on the west side of Guelph St. between Durham St. and Maple Ave. A final planning report with recommendations will be presented to Halton Hills council at a future date.

Parents want to protect their kids. It's no different when they're in the car.

- Child safety seats save lives. They're required by law for all children up to the age of eight.
- Over 80% of child safety seats are not used properly. Make sure your safety seats are installed correctly.

Call 1-800-268-4686 or visit www.ontario.ca/smarterlove for information and installation tips.

• Infants face the rear until 20 lbs (9 kg)

• Toddlers face forward from 20 lbs to 40 lbs (9 kg -18 kg)

• Children use booster seats until they are 80 lbs (36 kg) or over 4' 9" (145 cm) tall or are 8 years old
