

### Garden tour on Sunday

Norma Jean Smith (left) of Georgetown Horticultural Society admires the gardens at the home of Stella Rothney, 9 Nixon Cres., as they prepare for the annual spring garden tour Sunday, June 11. The event runs from 10 a.m. to 4 p.m. and allows participants the opportunity to see outstanding gardens. Tickets, \$10, are available in advance at Foodstuffs, Hallmark Greetings or Salon Marcel, or on the day of the tour only at 41 Treanor Cres., Georgetown. Tickets will not be available at individual gardens.

Mon. & Fri. 10-6 ~ Tues., Wed. & Thurs. 11-7 (later bottling by appt.)  
Saturday 10-4 ~ Sunday CLOSED

### Wunderkid guitarist to perform in Toronto on Saturday

Talented 13-year-old guitarist Chris Cotton of Georgetown will perform with the Bluesers, a blues band, at the Silver Dollar, 486 Spadina Ave. in Toronto on Saturday, June 10, 9-9:40 p.m.

The Centennial School student has recently returned from the NXNE, a world-renowned international blues challenge in Memphis Tennessee. The Bluesers were the sole Canadian representative in the competition and Chris was the youngest guitarist in the 22-year history of the event.

The Bluesers consist of three family Cotton members at its core: Chris, Mike Cotton Jr. (age 16) on drums, also one of the youngest performers at NXNE, John Cotton on bass and Mike Branton, on guitar and vocals, and who is one of the top players on the Toronto scene. For more information on the band go to [www.thebluesers.com](http://www.thebluesers.com)

## Tooth Chatter

by

ALEX TRENTON

DENTURIST

LET'S THANK SCIENCE FOR TODAY'S TEETH

Over the centuries that man has made artificial teeth, many materials have been used in fabrication. These include have bone, ivory, human teeth, wood, gold, silver, porcelain, vulcanite and variety of plastics. Some materials could only be carved to shape. Others were crude fitting casting to which strips of whale bone or springs were attached in an effort to hold them in place. The most famous set of dentures of this latter type were worn by George Washington.

VULCANITE

When Charles Goodyear invented vulcanite in the 1840's it was a great step forward in obtaining a degree of fit not before possible. In decades past, denture wearers have had to persevere with denture bases and teeth of a very simple nature. But science's ever increasing control over the elements involved in denture construction, the art has not only become more precise and durable but has also been allowed to broaden its scope and imagination.

COMPLEXIONS AND PERSONALITIES

Through the advances of science the expanding technology of denture manufacturers is practically boundless. With stable base materials available, the tooth manufacturers have concentrated on creating porcelain and plastic teeth to match not only every complexion but every personality too. From the active and outgoing male to the soft and delicate female, every type of personality has been considered and incorporated into the individual plastic and porcelain teeth available to Canadians today. It is now possible for denture specialists to construct a finer and more uniquely personal product than ever before. Remember, consultations are always free.

You do not need a referral; simply call our office direct.

Creating confident smiles since 1982.
