... Lend Me Your Ears

A diminished social life is one of the most difficult aspects of age related hearing loss. Many people avoid drawing attention to their hearing loss by having fewer social contacts when it becomes difficult understanding what is being said. The result is an altered and lonely existence that family and friends may mistake for dementia.

Learning new strategies to cope with hearing loss could go a long way to restoring confidence and improving communication. The Hearing Clinic recommends the following: Inform people of the hearing loss so they may modify their speech; eliminate background noise; watch the speaker carefully and sharpen natural lip-reading abilities; ask the speaker to repeat what was said if necessary, and above all else; have your hearing thoroughly tested and properly fit with one of today's modern hearing instruments. Contact The Hearing Clinic if you or someone you know needs assistance.

IF YOU WEAR DENTURES

1. Avoid using pads, liners or denture adhesives to improve the fit of your dentures. If they're loose, see your denturist. Your gums, like your eyes, change as you get older. Dentures, like eyeglasses, must be adjusted or changed periodically.
2. Avoid using very hot or very cold water on your dentures, and don't let them dry out. Such extremes can cause your denture to warp.
3. Remove your dentures overnight and put them in a container filled with water. This won't cause your face to sag! It will give your gums a needed rest. Healthy gums will extend the life of your dentures.
4. Have yearly check-ups. Our office does not charge for consultations. If you follow these tips, your dentures will fit, function and look their best.

You do not need a referral; simply call our office direct.
