LOSS OF HEARING DUE TO NON-AGING FACTORS

Hearing loss due to aging can be compounded by other things. A few of these include noise exposure, disease, and ear infections.

Hearing loss due to age and noise are cumulative. That is, hearing loss from noise exposure will be added on to hearing loss due to aging. Neither are not medically correctable. There is something to be said for protecting the hearing that we have left by wearing hearing protectors when exposed to noisy environments.

Each of us reacts differently to hearing loss. We may totally or partially deny that a problem exists. Typical "denial" statements are "you're mumbling again", or "I was not paying attention", and can be a way of concealing hearing difficulties.

BACK TALK

By Dr. Gabor Madarasz

Well here we are with all the kids back at school! For some it's a well deserved break to be able to sit with coffee in hand and relax. It occurred to me over the weekend that many families have been preparing for annual back to school with clothing, books, school supplies etc. Here at our office we have tried to annually hold our scoliosis spinal checks as a preventive measure for family members as our back to school event. We would typically do these as a no charge community service. The interesting fact though was that because of restrictive advertising laws by our board we weren't allowed to advertise this FREE event. However this year as I was performing one of these checks a mother was being very stern with me as she told me she wished she had heard about this earlier. It turned out that one of her kids had already had radical surgery as a result of scoliosis. The fact is that many of these curvatures are treated conservatively with proper chiropractic care. The entire check takes us 15 minutes, involves computer measures and is very reliable. So there, now you all know, and can call to have one done asap. PS. Please tell Patricia that you read this in the paper when you call or you can leave a message.

CtK teacher facing charge of forcible confinement

A teacher at Georgetown's Christ the King Secondary School has been charged in connection with an alleged attempt to deprogram a woman who joined an evangelical Christian group in Hamilton.

Charged by Hamilton Police with forcible confinement is Lucie Brun Del Re, 54. The charge carries a sentence of up to 10 years in prison if convicted.

Joe O'Hara, executive officer of human resources services with the Halton Catholic District School Board, said Brun Del Re is a French teacher at the Georgetown high school, and continues to work there.

"We're comfortable that she can continue to fulfill her duties and obligations," said O'Hara.

He added the charge has been reported to the Ontario College of Teachers.

Also charged in the incident is Dr. Renato Brun Del Re, 53, a family physician in Mississauga and his son Giancarlo, 25. They have been charged with kidnapping and forcible confinement. The maximum sentence upon conviction is life in prison.

Hamilton Police laid the charges in connection with the alleged abduction of a woman who three years ago joined the Dominion Christian Centre (DCC).

Members of the Christian group deny allegations of being a religious cult.

Police say the woman was snatched near the church just before Christmas and held 10 days before she was able to escape.

Police say the victim was walking to work at 8:30 a.m. on Dec. 21 when she was forced into a van by a group of men and taken to a location in Halton.

Police say they are looking for more suspects.

Pastor Peter Rigo, a former painter and decorator who founded the DCC six years ago, said a well-known American deprogrammer was brought to Halton to try to talk the woman into leaving the group.

Rigo, 41, runs the centre along with his wife Peggy. He said the DCC is nothing more than a bible-based church that believes in praying for the revitalization of downtown Hamilton and positive change for people through believing in Christ.

The accused are to return to court on September 25.

OLD AGE IS GOLDEN?

**There is nothing the matter with me,
I'm healthy as can be,
I have arthritis in both of my knees,
And when I talk, I talk with a wheeze,
My pulse is weak and my blood is thin,
But I'm awfully well for the shape I'm in.**

**Arch supports I have for my feet,
Or I wouldn't be able to be on the street,
Sleep is denied me night after night,
But every morning I find I'm all right,
My mem'ry is falling, my head's in a spin,
But I'm awfully well for the shape I'm in.**

**How do I know that my youth is all spent?
Well, my "get up and go" has got up and went,
But I really don't mind when I think with a grin,
Of all the grand places my "get up" has been.**

**Old age is golden, I've heard it said,
But sometimes I wonder as I get into bed,
With my ears in the drawer," my teeth in a cup",
My eyes on the table until I wake;
E're sleep comes o'er me, I say to myself:
"Is there anything else I should lay on the shelf?"**

Drinking
and
Driving
Can Distort
Life.

Drink and drive, and your life may never be the same again. You not only risk your life when you drink and drive, you also risk losing your license, incurring expensive fines, doing time in jail or even causing injury or death to an innocent bystander. With all these consequences facing you, driving under the influence is the worst decision you can make. Don't take chances with drinking and driving; there's always a better alternative.
