With so many great automotive repair shops and dealers in town, it can be a hard decision to determine where to bring your vehicle for service. Every shop has qualified technicians and up to date service equipment. But where do you take your car or truck? How do you decide what's best for your vehicle and your budget? At Turner Automotive we would like to think we are different from all the other shops in town, and here's why. Not only do we have specialized equipment for performing the necessary services on your late model car or truck, but we also have specialized technicians. We have an Import and European car specialist, a General Motors specialist, a Ford specialist and a Chrysler specialist. Each technician has spent years of extra training on those specific brands and that gives us an edge when it comes to diagnostics and service for your late model car or truck. Our new location has been equipped with all the latest equipment to provide the best possible service we can. We also have a new website, from where you can view maintenance schedules, book your appointment or just learn about all the different systems on your car. Turner Automotive has been providing reliable, affordable and courteous service for the past 7 years. These are the things that we feel separate us from the rest, so if you are new to town or are just tired of taking your vehicle to the dealer, give Turner Automotive a try, you won't be disappointed.

Don't let your transmission take you for a ride

90% of automatic transmission failures are due to overheating and fluid contamination and a replacement could cost over \$2,000. A typical transmission flush replaces only about 40% of the old, contaminated fluid. **Turner Automotive's Transmission Flush Service replaces over 95% of the used fluid while safely removing sludge and varnish deposits.** We then add conditioners to the fresh ATF to extend ATF life, revitalize seals and O-rings and help maintain smooth shifting.

from \$99.99

Don't wait for your cooling system to let you down.

Turner Automotive's Cooling System Flush Service utilizes specially designed equipment that connects to your vehicle's cooling system, and when combined with Wynn's proprietary cooling system chemicals, safely **power flushes out 95% of the old coolant and contaminants** including rust, sludge and scale deposits. A proprietary product is added to the fresh coolant that will stop most radiator and heater core leaks, prevent foaming, and lubricate the water pump. Our state-of-the-art coolant exchange equipment is approved by multiple major vehicle manufacturers and insures a fast and complete cooling system flush service everytime.

Green Coolant up to 14 litres \$109.99

Long life coolant up to 14 litres \$139.99
