# Reduce home energy costs by renovating your basement

"Transforming a basement from cold and damp to dry and warm is easy with polystyrene panel insulation," says Stephen Molnar, Insulation Expert, Owens Corning. "In addition to increasing your comfort and energy savings, a properly insulated basement boosts your home's resale value and creates a healthier indoor environment for your family by discouraging the growth of molds and fungi."

(1) Make your home more comfortable

When your basement is well insulated and sealed, you feel warmer in winter and cooler in summer. With no chilly drafts and less summer heat entering your house, the whole family can relax in comfort.

Owens Corning's PINK® Fiber Glass Insulation can help homeowners alleviate a number of other potential problems including poor indoor air quality and noise disturbance:

- Damp unhealthy basements can be alleviated with the help of insulation. Use Owens Corning PINK® Fiber Glass Insulation or Celfort® 200 Cel-Lok® System Extruded Polystyrene Insulation for walls and feel free to take a deep breath!

- For floors, install Celfort® 200 System Extruded Polystyrene Insulation- Celfort® offers exceptional resistance to moisture of all types including ground water, condensation and water leakage. In addition, its high insulating value of R5 per inch of

thickness is maintained long term, providing you with increased comfort for years to come.

(2) Cut heating and air conditioning costs

When you insulate your basement properly with Owens Corning products you increase energy efficiency. Heat flow between inside and outside is reduced to a minimum. In winter, you need less heat to keep your house warm. In summer, air conditioning is more effective.

(3) Increase resale value

Of all improvement projects, insulating is one of the best ways to increase your home's resale value. Once insulated, you can confidently finish areas for living and working activities - thus adding to the valuable square footage available.

For more information on your home's insulating system, call the Owens Corning answer center at 1-800-GET-PINK® or visit the website at [www.owenscorning.com](http://www.owenscorning.com).
