Natural gas water heaters

Save \$1,600

or more* on your water heating energy costs over the water heater's lifespan.

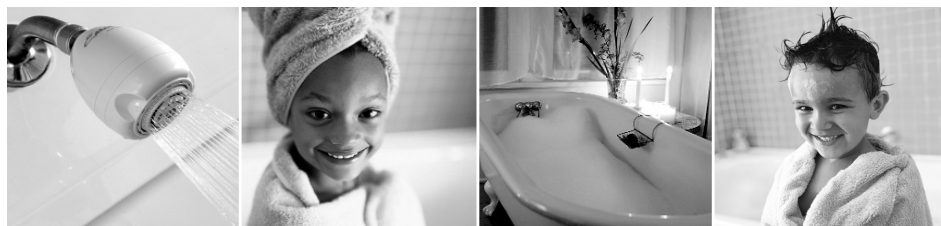

That's because with a natural gas water heater you'll save 35% on your water heating energy bill when compared to electric – which means that over the average 13 year lifespan of a water heater, you'll save \$1,600!

And your family will also enjoy an abundant supply of hot water because a natural gas water heater is

2 times faster

at heating water compared to electric.
