

## Party on!

The Acton Community Support and Treatment Team (ACSTT) of the Canadian Mental Health Association, held their annual Christmas party at Acton Legion last week with 140 clients attending. Among those enjoying the party were (from left) Kevin Emmerson, Holly

McMaster and Wayne Warren, who were joined by (in back) staffers Rebecca Jones and Linda Luker. The clients enjoyed a night of dinner, dance and gifts, donated by individuals and businesses.

### DIGITAL AUDIO PROCESSING

Digital technology is used everywhere. It enables communication satellites to link people and computer systems all over the world in products such as telephones, compact disc players and personal computers. Digital technology has become part of our daily lives. Now, digital technology transforms the way we communicate on a more personal level.

Researchers have spent years looking for a way to put the superior acoustic quality of digital sound processing into something as small as a hearing instrument. Finally the breakthrough, digital audio processing designed to fit into a small, comfortable and attractive hearing instrument. Using the same digital technology that brought superior sound quality to CD players, sound reproduction is clear, distinct and provides a rich and full sound picture. Soft sounds are amplified so they become audible, and loud sounds are kept from becoming uncomfortably loud.

Communication forms, maintains and enhances relationships between people. Good communication is a vital ingredient to an enriched life. Now digital technology offers a whole new range of possibilities for people with a hearing difficulty.
