

A great skate

Skaters Darren Pennock, right, and Mark Hayward, of Georgetown, were part of the Skate in the Park at Dark team that raised more than \$10,000 for sick children recently. They, along with Tim Fielding, Aldo Campitelli and Tony Hayward, also of Georgetown, skated 1,000 laps around Brampton's Gage Park in support of Sunshine Dreams for Kids. Pennock skated the entire 1,000 laps while the others combined to also skate 1,000 laps, about the distance between Brampton and Montreal.

At Civic Centre next Thursday

Meeting on Hungry Hollow trails set

CYNTHIA GAMBLE
Staff Writer

After \$93,000 for trails was added into the 2007 capital budget, the Town will begin a new phase to develop the Hungry Hollow Ravine trails with a public meeting next Thursday night (March 1).

The meeting will focus on accessways to Hungry Hollow, in particular those in the areas from Cedarvale Park south to Mountainview Road. The meeting will be held at the Civic Centre, 1 Halton Hills Drive, at 7 p.m., with public information available for viewing starting at 6:30 p.m.

A second public meeting for the

area east of Mountainview Road to Willow Park will be held Tuesday, April 3.

Together with community partners— POWER (Protect Our Water and Environmental Resources) Willow Park Ecology Centre and Save Our Ravines who were actively involved in the development of the Hungry Hollow Management Plan— staff will present information on what has been done to date in the ravine, future plans for monitoring, communications and trails, and ways for the local neighbours to become involved through monitoring or restoration planting projects.

“The Hungry Hollow Ravine is a fantastic natural resource for the

Town” said Recreation and Parks Department Director Terry Alyman. “The neighbourhood meetings are vital to the community’s awareness of Hungry Hollow, and the residents’ input into the implementation of the Management Plan is critical to its success.”

Display material will be available at the public meetings and additional background material can be found on the Town’s website, www.haltonhills.ca/Rec_Studies_Documents.asp or by calling Warren Harris, Manager of Parks and Open Space at 905-873 2601, ext 2274.

Notice of Completion.

HALTON HILLS GENERATING STATION

TransCanada Energy Ltd., a wholly owned subsidiary of TransCanada PipeLines Limited, has completed an Environmental Review Report on a new electricity generation facility, the Halton Hills Generating Station (HHGS), in the Town of Halton Hills.

The HHGS is a 683 MW natural gas fuelled, combined-cycle facility. The HHGS will be located on undeveloped lands in the Halton Hills 401 Corridor Industrial Area on a site located between Highway 401 and Steeles Avenue west of 6th Line. The HHGS was awarded a contract in November 2006 by the Ontario Power Authority (the “OPA”) in response to the OPA’s Request for Proposals for a Generating Facility with a contract capacity of 500 MW to 600 MW connected to the area surrounding Trafalgar TS (Request for Proposals No.: GTA-West-Trafalgar-2006).

The Environmental Assessment for the HHGS is following the Environmental Screening Process as set out in the “Guide to Environmental Assessment Requirements for Electricity Projects” (the “Guide”) under Ontario’s Environmental Assessment Act. The Environmental Screening process has two possible stages—the Screening Stage and the Environmental Review Stage. For the HHGS Environmental Assessment, both stages were undertaken.

The Environmental Review Report (ERR) and supporting documentation is now available for a 30-day public review period as called for in the Guide.

Residents, businesses, and community groups are invited to visit our website for a copy of the complete report at www.transcanada.com/haltonhills.

The report and supporting documents are also available for viewing at the following locations:

Clerk’s Office
Town of Halton Hills
1 Halton Hills Drive
Halton Hills, ON L7G 5G2

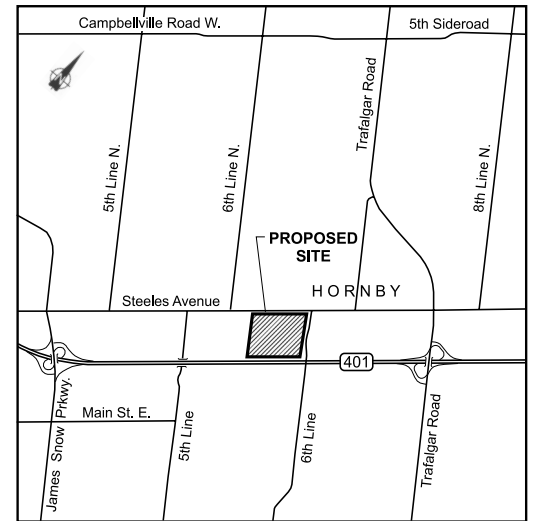

Clerk’s Office
Town of Milton
43 Brown St.
Milton, ON L9T 5H2

Georgetown Branch
Halton Hills Public Library
9 Church St.
Georgetown, ON L7G 2A3

TransCanada is committed to consulting with the public and other stakeholder groups throughout the development of this project. If an interested party has outstanding environmental concerns about the project, please address these to HHGS at the contact information below and we will attempt to seek a mutually acceptable resolution. Concerned citizens have the option of sending in a written request to the Director of the Environmental Assessment and Approvals Branch, Ministry of the Environment to elevate the project to an individual Environmental Assessment. A copy of the elevation request must be sent to the proponent. The last date when requests for elevation can be received is March 26, 2007.
