Council happy to get more gas tax cash

Halton Hills council members lauded the recent federal government's decision to extend the gas tax transfer to municipalities by two years to 2013-14.

The announcement was made during the unveiling of the federal budget last month.

The Gas Tax Fund money will be used for municipal priorities including roads, public transportation and water.

Mayor Rick Bonnette said it was welcome news that the federal government was investing in municipalities. He noted that a Price Waterhouse report presented to a recent GTA Mayors and Chairs meeting revealed that 92 per cent of taxes paid in Canada go to federal and provincial governments while only 8 per cent goes to municipalities— yet towns and cities are responsible for paying for 50 per cent of the infrastructure costs.

"So it's very welcome that they're going to continue the program until 2014," he said.

Regional Councillor Clark Somerville requested a report from Finance Director Ed DeSousa outlining the impact the Gas Tax Fund decision will have on Town coffers.

DENTAL MATERIALS

Charles Goodyear invented a denture base material back in the mid 1800's. This material was called "Vulcanite". Vulcanite is a dark brown, semi-rigid rubber. Since then, denture base materials have come a long way, and vast changes and improvements have been made. Today very modern plastics and acrylics are used.

The artificial teeth on a denture were made from such materials as bone and ivory. Precious metals such as gold and silver were also tried. Even wood was used to make teeth!

Finally, porcelain and plastic teeth have replaced the former materials. We've come a long way since the days of "wooden teeth". Denture technology has been vastly improved for denture wearers, and they are continually discovering new techniques and materials.

Today, more than 5 million Canadian adults are wearing dentures. That's more than one out of every four people in Canada.
