### Tell us about Teaching and Learning in Schools

From April 23rd to May 18th, 2007 parents with children in the Halton District School Board will once again be invited to complete a *School Effectiveness Survey*. The results of the survey will provide important data to be used to shape system and school effectiveness planning for improving student learning. Parent survey results will be examined in conjunction with survey results from students, teachers and non-teaching staff.

The survey will be available beginning April 23, 2007 at [www.hdsb.ca](http://www.hdsb.ca)

Parents may complete the survey on-line from wherever Internet access is available (home, work, or at your child's school). If you do not have access to the Internet, please discuss alternatives with your child's school Principal or Vice-Principal.

**NOTE:** To log-on, parents must have their child's/children's Ontario Education Number (OEN), a number found on report cards for security purposes.

Further information is available through your child's school or by contacting the Research Department, Halton District School Board at (905) 335-3665, ext. 3280.

By Cory Gentes  
CPGA Head Golf Professional

One of the most common issues I see in golfer's swings early in the season is a lack of balance. Having good balance is one of the keys to having a repeatable consistent golf swing.

It is very important to create a solid base of support with the lower body so that the upper body can turn over it. This starts with a nice wide stance with the feet just outside shoulder width. Often we hear that the feet need to be shoulder width apart and unfortunately people will put their feet directly below their shoulders. This creates a narrow stance that when we shift our weight naturally in the golf swing puts most people off balance.

A good balance drill is to make full practice swings starting with a slower swing speed and gradually getting faster until you reach the point where you can no longer swing in balance. Now try the same thing while hitting balls and you will quickly find out how fast you can swing and still remain balanced.

A good early season exercise and balance test is to stand on one foot and then the other for as long as you can. Once you get confident, try the same thing but close your eyes.
