TERRA Trends GREENHOUSES

More Pond Myths Debunked

Water in the landscape is a lifestyle more and more people are choosing every day. Check back each week as we dispel some of the common myths surrounding this latest trend in gardening.

Myth 5: Water features are breeding grounds for mosquitoes.

Fact: Mosquitoes breed in still, standing water. A well-designed backyard water garden has lots of water flow, in which mosquitoes don't like to breed. Also, ponds and water gardens support fish, frogs, toads and other wildlife that are natural predators of mosquitoes.
