

## Chamber hires local student as travel counsellor

Summer has almost arrived and the busiest tourist season of the year has come with it.

This summer Halton Hills Chamber of Commerce, with funding assistance from the Town of Halton Hills, has hired James Lee to cater to the community's tourism and travel needs. As travel counsellor, Lee will aid residents and visitors to discover the wonders of Halton Hills.

His responsibilities include providing current information on the events and attractions in the area, directions, and information on accommodation in the area. The Chamber is open to walk-in requests, e-mails, and phone inquiries for information. Many brochures and information packages are available at the Chamber for those interested and any questions on tourism in the community will gladly be answered.

Lee has been a resident of Halton Hills for nearly all his life, living the past 15-years in Acton. He has been very active in the Acton community, and has good knowledge of the Halton Hills area. He is currently a student at the University of Guelph, completing an Honours Bachelor of Science degree in the Biomedical Sciences.

The Chamber of Commerce is located at 328 Guelph St., Georgetown and is open from 9 a.m. to 5 p.m. Call the Chamber at 905-877-7119 or e-mail Lee at [tourism@haltonhillschamber.on.ca](mailto:tourism@haltonhillschamber.on.ca)

Inquires can also be made at the website: [www.haltonhillschamber.on.ca](http://www.haltonhillschamber.on.ca) Also, look for Lee at local events, such as the Georgetown Farmer's Market and the Leathertown Festival, promoting the community's many attractions.

**Heart Disease and Stroke!**

Support the Heart and Stroke Foundation.

**Lyme disease is proving to be one of the fastest spreading and under-recognized diseases in the Northern Hemisphere.**

*Canada claims cases of Lyme disease are rare. We disagree.*

If Lyme disease is so rare...

- 1) How is it showing up in the brain tissue of those with Alzheimer's disease?
- 2) Why does research state that multiple sclerosis is often associated with Lyme infection?
- 3) How is Lyme disease being cultured from the bowel walls of colitis victims?
- 4) Why do so many people who have been diagnosed with Chronic Fatigue Syndrome or Fibromyalgia improve only after testing positive for, and then being treated for, Lyme disease?

1.5 million Canadians have these other diagnoses. Research must be done, including biopsy of organ tissue and post mortem study of all those diseases linked to Lyme.

**For more information contact the Canadian Lyme Disease Foundation [www.canlyme.org](http://www.canlyme.org)**
