More promotion needed for local water—Region

Regional council wants to see more promotion when it comes to the quality and benefits of Halton's water.

Council passed a motion at its meeting Wednesday that directs staff to investigate and report back with a communication plan to promote the Region's water. The resolution calls for the plan to address consumer choice, fluoride content, bottling of Halton's water (which the Region already does to promote its water) and the decision process that led to implementing ozonation technology for water disinfection.

The motion was made by Burlington Councillor Peter Thoem, who brought the item forward after hearing from a resident who suggested the Region should advise the public on the quality of water they can get from their tap.

Staff will bring a report back on the issue to future committee and council meetings for consideration.

Meeting time incorrect

Based on information contained in a motion passed by regional council, an incorrect time for a public meeting involving Gord Miller, the Environmental Commissioner of Ontario, was reported in the Jan. 18 edition of *The Independent & Free Press*.

Miller will take part in the public meeting at Halton Regional Centre Monday, Feb. 11 from 6:30-7:30 p.m.

SECOND HAND SMOKE INCREASES EAR INFECTIONS IN CHILDREN

Ear infections are the Number One reason young children visit their doctors and take antibiotics. A new study finds many of those infections could be avoided if parents who smoke would make one important change.

A recent study in the archives of pediatric and adolescent medicine is giving parents another reason to quit. It finds exposure to cigarette smoke in the home increases children's risk of middle ear infections. The smoke inflames the tissues of the middle ear so that viruses and bacteria can invade more easily and cause infection.
