FOUNDRY OPERATOR

Alcoa Power and Propulsion is the leading manufacturer of complex aluminum parts for the aerospace industry. We currently have a full time opening for an experienced Foundry Operator.

Reporting to the Casting Supervisor, the Foundry Operator is responsible for participating in the safe and reliable production of quality parts by performing tasks involved with casting and melting metal.

Duties include:

- Follows training and technical instructions, and uses proper tools, equipment, processes and materials to ensure manufacturing consistency and repeatability.
- Removes castings from pressure pots, moves materials and cleans equipment and work area.
- Transfers shells from de-wax to casting area.
- Loads and removes shells from ovens.
- Helps transport and pour ladles of molten metal.
- De-slugs molten metal; skims slag from degas and surface of molten metal.
- Removes cast shells from pressure pots, loads conveyor and moves cast shells out of the foundry for cooling.
- Loads, moves and unloads melting stock.
- Contributes to investigations to improve, correct or optimize quality or processes.
- Moves castings by hand or by using hand cart with hoists. Scrapes and cleans crucibles at end of workweek.
- Operates furnace doors and temperature controller on ovens.
- Operates and controls temperature on melt pots.
- Makes chemistry addition to melts when required by spectrograph operator.
- Cross-trained in a variety of areas of the operation.

Secondary school graduation is required, plus several years experience in manufacturing, 3 of which must have been in a foundry environment. Must be able to understand and be committed to following activity instructions, product criteria and standard operations. Capability of interpreting and understanding visual specifications is needed.

Please apply on line to HOUHGEHR@alcoa.com including FOUNDRY OP in the reference line or by mailing your resume to Human Resources at APP-AFCP, 93 Mountainview Road North, Georgetown, Ontario L7G 4J6
