

Region supports plan to ban smoking in autos carrying children

Halton Region is backing a provincial private member's bill that proposes a ban on smoking in cars carrying children.

Regional council passed a motion recently that calls on Chairman Gary Carr to write to the premier endorsing Bill 11, the proposed amendment to the Smoke-Free Ontario Act that

would put the kibosh on smoking in vehicles with kids under 16.

Premier Dalton McGuinty recently said he would take a second look at enacting such legislation.

The council resolution also directed staff to continue working on a proposed regional bylaw that would prohibit smoking within nine

metres of an entrance to a public facility.

The Region has already adopted the nine-metre rule for all of its buildings.

A staff report with recommendations on the bylaw issue will be brought back to council in the spring.
