BOUTIQUE

Spring Fling

Thursday March 27

Come and see what is new for spring!

* Fashion Show at 7:30pm

* Save 10% on everything in the store.

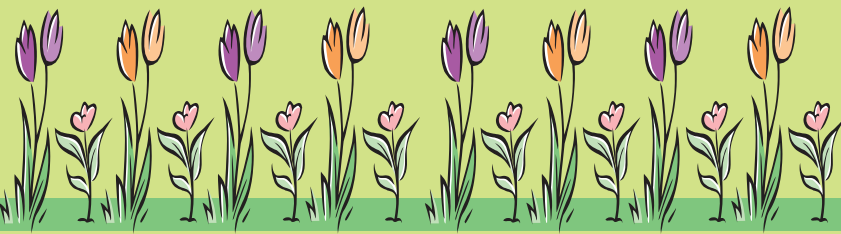

Bring a friend and save 15%!

* Save an additional 15% on sale items

* Refreshments & Door Prizes

As space is limited, please RSVP to Moxxi at 905-877-0111. 70 Main St. Georgetown

Hydro One to alter route for new lines in Halton Hills

LISA TALLYN
Staff Writer

Hydro One has announced its recommendations for proposed transmission route refinements for the Bruce to Milton Transmission Reinforcement Project, and has decided to switch the route in Halton Hills.

In the Halton Hills area the company has decided to move forward with the proposed refinement route on the west side of the existing line instead of the original route proposed that would have seen the new 500kV line run down the east side of the line.

"The refinement route was recommended as it provides a significant socioeconomic improvement over the reference route, namely fewer property purchases, without creating additional effects on the natural environment," said Gary Schneider, Hydro One Project Director. "This means that the transmission line would now shift from the east to the west side of the corridor starting in the vicinity of Hwy. 7 in Halton Hills."

Schneider said by switching the route to the west side it avoids having to relocate five residents, which would have been required if the line had gone along the east side.

He said in the case of the west side route in the Halton Hills area Hydro One still will purchase two properties, but in those instances there are no homes on the properties.

Hydro One made the decision on the route refinement following an environmental, socio-economic and technical analysis of

both the routes, which included information gathered through public and stakeholder consultation.

Other refinement routes along the 180 km line from the Bruce Power facility in Kincardine to the transmission station in Milton were not recommended by Hydro One. Refinements were being considered in the Brockton/Hanover/West Grey and Camp Creek areas.

The recommended route, which includes the change in Halton Hills, will now go forward to the Environmental Assessment (EA).

Schneider said Hydro One hopes to get a decision from the Ministry of Environment on the terms of reference for the assessment in early April, and EA approval in early 2009.

He said letters have been sent to all affected landowners. Those on the east side of the line have been told they are no longer affected, said Schneider. Additional information has also been sent to affected landowners on the west side.

Hydro One plans to have the line in service by Dec. 2011.

Sideroads is out this week

The Spring 2008 edition of *Sideroads of Halton Hills* will be distributed this week.

Some residents will receive a copy of *Sideroads* inside today's *Independent & Free Press* while most will get a copy with Friday's edition of the newspaper.
