

# Angora goat breeder guests at knitting club meeting tomorrow

Attention all fibre enthusiasts! Come and hear an interesting talk presented by Nancy Munnoch-Green from Shelburne, a breeder of angora goats and a mohair fibre producer, on Thursday April 10, 7 p.m.

Munnoch-Green will be bringing a variety of yarn and fibre and talking about many different processes, such as washing, skirting, blending and spinning that turns fibre on the hoof into soft yarns. This will be a hands-on presentation—a super chance to touch fibres and learn about how yarns are made.

The evening is hosted by Halton Hands and Motion Knitting and Crocheting Guild at 318 Guelph St. (rear entrance) between Swiss Chalet and Honda. The admission fee for non-members is \$5. Please call Diane at 905-877-1521 for more information.

Fiona Ellis, a well known Canadian knitwear designer, who was the Guild's guest speaker last month, will be presenting two interesting knitting workshops about cables and about slip stitch knitting at Georgetown Yarn and Crafts, 170 Guelph St., Georgetown on Sunday, April 20. Please call Diane for more information about these workshops. You must register in advance.

## Income tax help

Links2Care offers free income tax services for low income individuals and families in Halton Hills. To qualify for this program income for singles must be \$20,000 or less and for families, \$25,000 or less. For more information about the program call Kim in the Georgetown office at 905-873-6502 or Cathy in the Acton office at 519-853-3310.

## Tooth Chatter

**CHANGES WITH PROLONGED DENTURE WEAR**  
 The denture is the most abused prosthetic aid to our wellbeing. They are mixed up with old sets, worn ill matched, broken and stuck together incorrectly, worn in two or three pieces, flushed down toilets, lost at sea, thrown at immovable objects, eaten by dogs, stamped on, and used for whittling by retirees! The emergence on the scene in the recent years of the "Denturist" has meant a closer and a more individual concept of patient - professional relationship. With this individual attention, fewer dentures will finish up in the bottom drawer! Your mouth is constantly changing as you grow older, whereas your dentures are hard and unyielding. Visits to your Denture Clinic at least once every year are recommended.

### PROPER FIT

At the first sign of ill-fitting dentures you should have them checked. If your denture is loose and falls down it could be a number of things. Your gums may have shrunk or, your bite may have changed. A denture that doesn't touch or "come together" correctly when biting may become dislodged. (Filling your dentures with gels or quick set plastic to secure them is a temporary solution that could give you a permanent problem). In addition, dentures are an artificial appliance and therefore have limited life expectancy. However, with today's materials, counselling and proper denture care, a patient should experience years of denture health and comfort. The musculature of the mouth is very intense and tightly knit in combination with an extremely demanding daily routine of chewing and speaking from morning until evening combine to wear down even the most durable of denture materials. As long as you are aware of the changes that take place and do something about what is happening you can ensure that your mouth will remain in a healthy state. If your dentures are not fitting or not looking as good as they should, give our office a call for a no-charge consultation.

Creating confident smiles since 1982.
