A diminished social life is one of the most difficult aspects of age related hearing loss. Many people avoid drawing attention to their hearing loss by having fewer social contracts when it becomes difficult understanding what is being said. The result is an altered and lonely existence that family and friends may mistake for dementia.

Learning new strategies to cope with hearing loss could go a long way to restoring confidence and improving communication. The Hearing Clinic recommends the following: Inform people of the hearing loss so they may modify their speech; eliminate background noise; watch the speaker carefully and sharpen natural lip-reading abilities; ask the speaker to repeat what was said if necessary, and above all else; have your hearing thoroughly tested and properly fit with one of today's modern hearing instruments. Contact The Hearing Clinic if you or someone you know needs assistance.

### WHY SEE A DENTURIST?

#### CONSIDER SOME OTHER BENEFITS OF SEEING A DENTURIST

\* As denture work is done at one location, quality of care is constant and personal...plus you get your dentures sooner.

\*The person who you see, is the same person who makes your denture, from start to finish.

\*That's all we do all day long. Dentures, denture, dentures! New or replacement, relines, repairs, adjustments, cleanings, whatever your denture requirements. We are the Denture Specialists.

\*Repairs can be done while you wait or in an hour or so in most cases. We fix your dentures right here in our own lab.

\* In addition, if a house or hospital call is needed, special arrangements can be made. You do not need a referral; simply call our office direct.
