Tooth Chatter

SORE AREAS

Periodically, your denture may cause some tissue discomfort. If you should develop a sore area, please call our office, but continue to wear the denture so we can pinpoint the source of the problem. We will make the necessary adjustments for you.

After the initial adjustment period, soreness may still occur occasionally, leaving the denture out of the mouth for a short time will normally eliminate this problem. A warm salt rinse (1 teaspoon to a glass of water) will be helpful.

Be careful when handling your denture. Always store it in water to prevent the plastic from distorting. The denture may warp if left dry for long periods of time.

Think positive! You should expect soreness. This is natural, be determined to wear the denture comfortably. You will adjust to your new denture.

Remember, you do not need a referral; simply call our office direct to make an appointment.

Creating confident smiles since 1982.
