## Energy-efficient windows can save money

Mike Patterson (left) and Anthony Maan (right) operate the Halton Window and Door Company, specializing in window and door installation. They are proud to be known as the company in Georgetown to offer the best in all aspects of window and door renovations. "Our windows are as energy efficient as it gets," says Patterson. He explains that the combination of Low E2 glass, argon gas fill, and S class and super spacer are what makes their windows rate No. 1 in Canada. However, a good window is only half of the equation. Removing the entire window to the original builder's opening and triple sealing the new window frame is essential in maximizing energy savings by minimizing heat loss. They explain that their windows not only save on gas in the winter but also on air conditioning in the summer. For more information on energy-efficient windows, contact the Halton Window and Door Company at 905-877-017 or call them toll free at 1-866-323-9992.
