

Halton Hills Hydro Municipal Transformer Station (MTS) No. 1

Class Environmental Assessment

NOTICE OF STUDY COMPLETION**Project**

An Environmental Study Report (ESR) has been completed by Halton Hills Hydro Inc. for the construction and operation of a 230/28 kV 125 MVA DESN municipal transformer station (MTS) along the Steeles Avenue corridor between Trafalgar Road and James Snow Parkway in the Town of Halton Hills, Ontario. The proposed undertaking would connect to the existing distribution network at 27.6 kV to provide a reliable source of power to address increased electricity demand as a result of new residential, commercial, and industrial development in the Town of Halton Hills.

Study Process

The Class Environmental Assessment (Class EA) study for this MTS is conducted in accordance with "Class EA for Minor Transmission Facilities" under the *Ontario Environmental Assessment Act*. The required consultation process was initiated for this study with the publication and notification of Study Commencement in the New Tanner (March 27, 2008), Georgetown Independent (April 2, 2008), and Free Press (April 2, 2008). Additionally, a Public Information Centre (PIC) was held on May 29, 2008 to provide opportunities for review and comment on the Project.

An ESR, prepared in accordance with the Class EA document, is submitted for information purposes to the Ministry of the Environment (MOE) and is also available for a 30-day public review commencing on September 3, 2008 and concluding on October 15, 2008. The ESR will be available for review on the Halton Hills Hydro website at www.Haltonhillshydro.com and at the following locations:

Halton Hills Hydro Inc. 43 Alice Street Acton, ON L7J 2A9	Town of Halton Hills 1 Halton Hills Drive Halton Hills, ON L7G 5G2
Regional Municipality of Halton 1151 Bronte Road Oakville, ON L6M 3L1	Halton Hills Library Acton Branch 17 River St. Acton, ON L7J 1C2
Milton Public Library 45 Bruce Street Milton, Ontario L9T 2L5	Halton Hills Library Georgetown Branch 9 Church St., Georgetown, ON L7G 2A3

Written questions or comments on the ESR must be received no later than 4:30 p.m. on Wednesday, October 15, 2008.

All correspondence should be addressed to:

Ms. Kathyrn Wherry
SENES Consultations Limited
121 Granton Drive, Unit 12
Richmond Hill, Ontario
L4B 2n4
Phone: 905-764-9380 Ext. 435
E-mail: kwherry@senes.ca
Facsimile: 905-764-9386

Ms. Natasha Roknic
Halton Hills Hydro Inc.
43 Alice Street
Acton, ON
L7J 2A9
Phone: 519-853-3700 Ext. 216
E-mail: Natashar@haltonhillshydro.com
Facsimile: 519-853-5168

If no concerns are expressed, the project will be considered acceptable and will proceed as outlined in the ESR.

If questions or comments on the project cannot be resolved by Halton Hills Hydro Inc. during the 30-day review period, the concerned stakeholder(s) may make a written request to the Minister of Environment to "bump-up" the project to an Individual EA as outlined in the Part II of the *Ontario Environmental Assessment Act*. Written requests must be received by the Minister no later than 4:30 p.m. on Friday, October 15, 2008 at the following address.

Ministry of the Environment
135 St. Clair Avenue West, 12th Floor
Toronto, ON M4V 1P5

Please note that a duplicate copy of the request must also be sent to Halton Hills Hydro Inc. at the address noted above.

This Notice of Completion is issued on Wednesday, August 27, 2008.

Information collected will be used in accordance with the *Freedom of Information and Protection of Privacy Act*. All comments will become part of the public record with the exception of personal information.

Protect yourself from WNV

Summer days and nights are often thought of with fond memories: swimming, sunshine, campfires, yard work, picnics, and popsicles. Until recently, the mosquito has been a common summer partner that is no more than a mere nuisance. But now, along with leaving an itchy red bump, a bite could infect you with the West Nile virus (WNV).

While the overall risk of becoming infected with WNV is not high, Halton Region is devoting significant efforts to the surveillance of WNV and taking actions to reduce human illness caused by the virus. We are working hard but we can't do it without your help.

We are asking each Halton resident to take steps to prevent mosquitoes from breeding and biting and to report dead birds to the Region. If you see a dead bird that has not yet begun to decay, please call the Region at 905-825-6000 or toll free, 1-866-442-5866. The bird will be picked up or we will give you instructions for safe disposal.

In August and September, when we are most likely to find WNV infections in people, it becomes increasingly important to protect yourself and your family from mosquito bites. Taking the following steps will help:

- Cover up. Wear light-coloured, long-sleeved shirts and pants with tightly-woven fabric.
- Avoid being outdoors in the

Gary Carr

early evening to morning. This is when mosquitoes are most active and most likely to bite. Mosquitoes are also active all day long in shady, wooded areas.

- Reduce mosquito breeding sites around your home by getting rid of all water-filled containers and objects. Change the water in bird baths at least once per week.

- Use an approved insect repellent, such as one containing DEET.

Blue jays and a crow have already tested positive for WNV this year in Oakville and Burlington, so I urge all Halton residents to continue to call in any dead bird sightings and to continue to take steps to prevent mosquito bites.

To report a dead bird or standing water, or for more information about how to protect yourself from West Nile virus, please call Halton Region at 905-825-6000, toll free 1-866-4HALTON (1-866-442-5866), TTY 905-827-9833, or visit our website at www.halton.ca/wnv.

—Gary Carr is the chair of Halton Region
