Offers may be cancelled at any time without notice. • Some conditions may apply to the Graduate Recognition Program. See Dealer for details. Ontario L6J 5E4

Contestants wanted for Acton Pageant

The Miss Acton Pageant is currently looking for participants for this year's event.

The festivities will take place on the opening night of the fair Friday (Sept. 14). The winner will begin a year-long experience of representing the Acton Agricultural Society and the town of Acton at numerous functions and events.

The Pageant format consists of a private interview with the panel of judges, an on-stage appearance and welcome greeting, and a two-minute prepared speech on a pre-approved topic. After the initial judging is complete, finalists are chosen and they are asked to answer an unknown question. The qualities the judges will be looking for in this year's winner are: her ability to make people feel comfortable; her friendliness and attitude; public speaking and presentation; poise and control.

Contestants are to bring two outfits for the night of the pageant. The first is to be conservative and something you would wear to an office job interview and the second outfit is to be formal and reflect how you would want to portray yourself if chosen to be Miss Acton. Make-up services are available to those who wish to use them.

All contestants receive a gift and passes to this year's fair. If you or someone you know would like to participate in the Miss Acton Pageant, please contact Leigh Whiting at 905-873-7318 or contestants can come to tomorrow's (Thursday's) rehearsal at the new Dufferin Rural Heritage Community Centre at Prospect Park at 5:45 p.m.

Tooth Chatter

by
ALEX TRENTON
 DENTURIST

LET'S THANK SCIENCE FOR TODAY'S TEETH

Over the centuries that man has made artificial teeth, many materials have been used in fabrication. These include have bone, ivory, human teeth, wood, gold, silver, porcelain, vulcanite and variety of plastics.

Some materials could only be carved to shape. Others were crude fitting casting to which strips of whale bone or springs were attached in an effort to hold them in place. The most famous set of dentures of this latter type were worn by George Washington.

VULCANITE

When Charles Goodyear invented vulcanite in the 1840's it was a great step forward in obtaining a degree of fit not before possible. In decades past, denture wearers have had to persevere with denture bases and teeth of a very simple nature. But science's ever increasing control over the elements involved in denture construction, the art has not only become more precise and durable but has also been allowed to broaden its scope and imagination.

COMPLEXIONS AND PERSONALITIES

Through the advances of science the expanding technology of denture manufacturers is practically boundless. With stable base materials available, the tooth manufacturers have concentrated on creating porcelain and plastic teeth to match not only every complexion but every personality too. From the active and outgoing male to the soft and delicate female, every type of personality has been considered and incorporated into the individual plastic and porcelain teeth available to Canadians today. It is now possible for denture specialists to construct a finer and more uniquely personal product than ever before. Remember, consultations are always free. You do not need a referral; simply call our office direct.

Creating confident smiles since 1982.
