### Win a walk-in bath from Superior

Superior Bath & Bed Canada Inc. was created to offer seniors the ability to maintain their independence with a focus on in home safety, comfort and enjoyment.

Seniors falling in their home is the major reason for hospitalization with broken bones and head injuries. A whopping 87 per cent of these injuries occur in the bathroom.

One of Superior's most popular products is the Superior 1 Walk In bath tub, which is equipped with inward opening doors, preformed seats, grab bars and have low-level entry heights. These features eliminate the difficult process of stepping up, over and into a conventional bath.

Once inside, you simply lower yourself onto the contoured seat and begin filling the bath with the easily accessible and easy to use thermostatically controlled lever handle taps. Push the button to the hydrotherapy jets and let all your tensions, aches and pains melt away.

Superior is offering area residents the chance to win a walk-in hydrotherapeutic bath tub, valued at \$6,995, through a draw. Applicants must be 65 or older or suffer from a physical impairment. To enter see the contest entry form in the Superior advertisement on this page.

People often try to convert their traditional bathtub by adding grab bars and benches. Conventional bathtubs were never designed to be safe even with these band-aid style solutions. Bathing can be a very difficult task for a large number of seniors— some have difficulty adjusting water temperature, some have more problems getting in and out of the tub and others have a very hard time getting down into the bath tub and then getting back up.

Walk-in bath tubs provide all of these features: easy entry, lowering and raising from the integral seat, access to shower and filler controls and anti scalding valve.

Bathe in comfort knowing you will have no fear of slipping or falling as you effortlessly raise yourself up from the seat and exit the bath.

Baths are available for home or health care facilities, physical/sports therapy centres and other commercial applications. Superior also carries a full line of touch of a button adjustable control beds from single, double, queen and king sizes in all levels of mattress firmness. Other safety solutions include emergency medical alert systems, personal medication dispensers, air purifiers and touch of a button bath lifters.

In-home safety assessments are offered free of charge to all seniors. Call Superior at 1-888-206-5796 or 416-727-0706.
