Championship— Oakville Rangers 5, Georgetown 0

... Lend Me Your Ears

By Cory Soal
R.H.A.D.

HOW DOES LOUD NOISE CREATE HYPERTENSION?

It appears to affect the nervous system, signalling the peripheral blood vessels to constrict as though under attack/ This triggers a surge of adrenaline and other fight-or-flight chemicals into the bloodstream - a response that carries with it the potential for glandular or cardiovascular changes, in other words, unwanted noise creates the same final results as increased stress (try to avoid)!
