Your Home in Halton Hills

Fall Home Care & Renovations

Don't neglect your furnace (or it might neglect you)!

Along with its effect on the colour of leaves, the autumn season in Canada brings those first cool nights that trigger the urge to switch on the old furnace or boiler, rousing it from months of dormancy. This is also the time of year homeowners should be thinking about having their home heating equipment cleaned and checked. Be sure your furnace is ready to battle the icy grip of winter by arranging a maintenance visit from your local heating contractor.

There are a number of components in your heating system that require regular inspection, including the heat exchanger, ignition system, fan, motor, bearings, belts, pumps, controls, exhaust, burners, pilot, thermostat, chimney and more. A properly licensed contractor will be able to identify problem areas and will recommend solutions that will ensure your year-round comfort. In the meantime, be sure to regularly replace the air filter on your forced air furnace and keep areas around hot air registers, return air grills or radiators free from obstructions.

For information on where to find a qualified contractor in your area, check out the website of the Heating, Refrigeration and Air Conditioning Contractors of Canada at www.hrac.ca, or call 1-877-411-4722.
